

Service Manual

(DB188RMP)

This product is a lead free model.

Lead free solder is used in PWB stamped LF mark.

Please keep the following conditions when you repair.

1. Use lead free solder.
 - * Koki's lead free solder S3X-55M 0.6mm
(CLARION Parts No.642-0231-01)
 - * Koki's lead free solder S3X-55M 1.0mm
(CLARION Parts No.642-0231-02)
2. Use a nitrogen solder system.
3. Do not use "General solder" and "Lead free solder" together.

SPECIFICATIONS

Radio section

Tuning system:	PLL synthesizer tuner
Receiving frequencies:	FM : 87.5 MHz to 108 MHz (0.05 MHz steps) MW : 531 kHz to 1602 kHz (9 kHz steps) LW : 153 kHz to 279 kHz (3 kHz steps)

CD player section

System:	Compact disc digital audio system
Frequency response:	5Hz to 20kHz(+1/-1dB)
Dynamic range:	90dB(1kHz)
Harmonic distortion:	0.01%

MP3/WMA mode

MP3 Sampling rate:	8kHz to 48kHz
MP3 Bit rate:	8kbps to 320kbps / VBR
WMA Bit rate:	48kbps to 192kbps
Logical format:	ISO9660 level1, 2 JOLIET or Romeo

General

Output power:	25 W x 4 (DIN45324, +B=14.4V)
---------------	----------------------------------

CD/MP3/WMA Receiver

Model **DB188RMP**

(PE-3050E-A)

DB189RMP

(PE-3050E-B)

DB189RGMP

(PE-3050E-C)

Power supply voltage:

14.4V DC(10.8 to 15.6V allowable),
negative ground

Power consumption:

Less than 15A

Speaker impedance:

4ohm(4ohm to 8ohm allowable)

Weight:

1.2kg

Dimensions(mm):

178(W)x50(H)x155(D)

COMPONENTS

PE-3050E-A/PE-3050E-B/PE-3050E-C

1. Source unit	_____	1
2. Mounting bracket	300-7742-00	1
3. DCP case	335-6035-22	1
4. Escutcheon(OUT-ES)	370-6286-00	1
5. Parts bag	_____	1
5-1. Removal key	331-2497-00	2
5-2. Rubber part	345-3653-20	1
5-3. Stopper	335-4899-20	1
5-4. Screw(M5x10)	716-0726-51	1
5-5. A-lead	850-6681-50	1

NOTE

* We cannot supply PWB with component parts in principle. When a circuit on PWB has failure, please repair it by component parts base. Parts which are not mentioned in service manual are not supplied.

* Specifications and design are subject to change without notice for further improvement.

* Use only compact discs bearing the or mark.

Some CDs recorded in CD-R/CD-RW mode may not be usable.

* Windows Media™, and the Windows® logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

* WMA is the abbreviation of Windows Media Audio, an audio file format developed by Microsoft Corporation.

* This product includes technology owned by Microsoft Corporation and cannot be used or distributed without a license from MSLGP.

To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

1. Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.

The use of unspecified parts shall be regarded as remodeling for which we shall not be liable. The onus of product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

2. Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulation tubes, bonding, gaps to PWB, etc, is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.

If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

3. Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

5. Cautions in soldering

Please do not spread liquid flux in soldering.

Please do not wash the soldering point after soldering.

6. Cautions in soldering for chip capacitors

Please solder the chip capacitors after pre-heating for replacement because they are very weak to heat.

Please do not heat the chip capacitors with a soldering iron directly.

7. Cautions in handling for chip parts.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc).

Please make an operation test after replacement.

8. Cautions in handling flexible PWB.

Before working with a soldering iron, make sure that the iron tip temperature is around 270°C. Take care not to apply the iron tip repeatedly (more than three times) to the same patterns. Also take care not to apply the tip with force.

9. Turn the unit OFF during disassembly and parts replacement.

Recheck all work before you apply power to the unit.

10. Cautions in checking that the optical pickup lights up.

The laser is focused on the disc reflection surface through the lens of the optical pickup. When checking that the laser optical diode lights up, keep your eyes more than 30cms away from the lens. Prolonged viewing of the laser within 30cms may damage your eyesight.

11. Cautions in handling the optical pickup.

The laser diode of the optical pickup can be damaged by electrostatic charge caused by your clothes and body. Make sure to avoid electrostatic charges on your clothes or body, or discharge static electricity before handling the optical pickup.

11-1. Laser diode

The laser diode terminals are shorted for transportation in order to prevent electrostatic damage. After replacement, open the shorted circuit. When removing the pickup from the mechanism, short the terminals by soldering them to prevent this damage.

11-2. Actuator

The actuator has a powerful magnetic circuit. If a magnetic material is put close to it. Its characteristics will change. Ensure that no foreign substances enter through the ventilation slots in the cover.

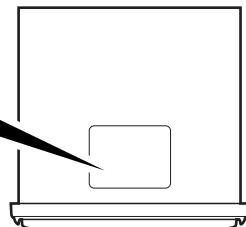

11-3. Cleaning the lens

Dust on the optical lens affects performance.

To clean the lens, apply a small amount of isopropyl alcohol to lens paper and wipe the lens gently.

CAUTION

This appliance contains a laser system and is classified as a "CLASS 1 LASER PRODUCT". In case of any trouble with this player, please contact your nearest "authorized service station". To prevent direct exposure to the laser beam, do not try to open the enclosure.

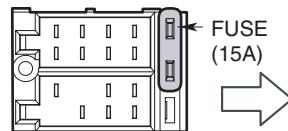

Bottom view of main unit

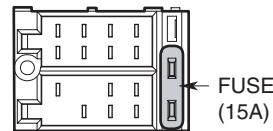

NOTES OF ISO CONNECTOR

1. For VW and Audi vehicles, change the position of fuse installation as shown on the diagram.(Figure 1)
ISO CONNECTOR type

For other vehicles (initial position)

For VW and Audi vehicles

Main unit side ISO connector

Figure 1

2. When the car stereo is installed in 1998 and later Volkswagen models, make sure to cut the car lead wire connected the A-5 terminal. (A breakdown could occur if the lead wire is not cut.) After cutting the lead wire, insulate the front end of the lead wire with insulation tape to prevent the risk of short-circuits.(Figure 2)

Note: Before cutting the lead wire, disconnect the car battery -- (negative) cable.

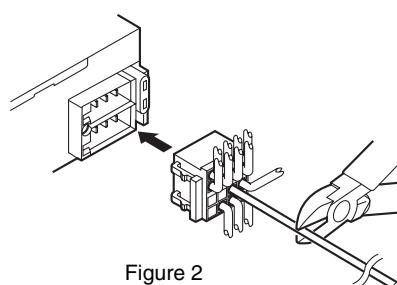

Figure 2

3. When the main unit is also connected to an external amplifier, connect REMOTE on the external amplifier to the previously cut lead wire on the side of the connector.

TROUBLESHOOTING

	Problem	Cause	Measure
General	Power does not turn on. (No sound is produced.)	Fuse is blown. Incorrect wiring.	Replace with a fuse of the same amperage as the old fuse. Read the attached "Installation/Wire connection Guide" once again and wire properly.
	No sound output when operating the unit with amplifiers or power antenna attached.	Power antenna lead is shorted to ground or excessive current is required for remote-on the amplifiers or power antenna.	1. Turn the unit off. 2. Remove all wires attached to the power antenna lead. Check each wire for a possible short to ground using an ohm meter. 3. Turn the unit back on. 4. Reconnect each amplifier remote wire to the power antenna lead one by one. If the amplifiers turn off before all wires are attached, use an external relay to provide remote-on voltage (excessive current required).
	Nothing happens when buttons are pressed. Display is not accurate.	The microprocessor has malfunctioned due to noise, etc.	Turn off the power, then press the [RELEASE] button and remove the DCP. Press the reset button for about 2 seconds with a thin rod.
		DCP or main unit connectors are dirty.	Wipe the dirt off with a soft cloth moistened with cleaning alcohol.
	No sound heard.	The speaker protection circuit is operating.	Turn down sound volume. Function can also be restored by turning the power off and on again. (Speaker volume is reduced automatically when the speaker protection circuit operates).
	No sound heard.	MP3/WMA files are absent in a disc.	Write MP3/WMA files onto the disc properly.
		Files are not recognized as an MP3/WMA file.	Use MP3/WMA files encoded properly.
		File system is not correct.	Use ISO9660 level 1,2 or JOLIET or Romeo file system.
CD/MP3/WMA	Sound skips or is noisy.	Compact disc is dirty.	Clean the disc with a soft cloth.
		Compact disc is heavily scratched or warped.	Replace with a disc with no scratches.
	Sound is cut or skipped. Noise is generated or noise is mixed with sound.	MP3/WMA files are not encoded properly.	Use MP3/WMA files encoded properly.
	Sound is bad directly after power is turned on.	Water droplets may form on the internal lens when the car is parked in a humid place.	Let dry for about 1 hour with the power on.
	Wrong filename	File system is not correct.	Use ISO9660 level 1, 2 or JOLIET or Romeo file system.

ERROR DISPLAYS

If an error occurs, one of the following displays is displayed. Take the measures described below to eliminate the problem.

	Error Display	Cause	Measure
CD/MP3/ WMA	ERROR 2	A CD is caught inside the CD deck and is not ejected.	This is a failure of CD deck's mechanism.
	ERROR 3	A CD cannot be played due to scratches, etc.	Replace with a non-scratched, non-warped disc.
	ERROR 6	A CD is loaded upside-down inside the CD deck and does not play.	Eject the disc then reload it properly.

If an error display other than the ones described above appears, press the reset button.

EXPLANATION OF IC

Main section

052-1955-00	LC8783J2PA-59H6-E	Main System Controller
Terminal Description		
pin 1 :DBGPO	: O : Not in use.	
pin 2 :DBGPI	: O : Not in use.	
pin 3 :DBGP2	: O : Not in use.	
pin 4 :B/U_DET	: IN : Backup detection signal input.	
pin 5 :ACC_DET	: IN : ACC detection signal input.	
pin 6 :REMCN	: IN : Remote controller signal input terminal.	
pin 7 :RDS_CLK	: IN : RDS clock pulse input.	
pin 8 :RES	: IN : Reset signal input.	
pin 9 :XT1	: IN : 32.768kHz crystal input, sub clock	
pin 10:XT2	: O : 32.768kHz crystal output, sub clock	
pin 11:VSS	: - : Connect to GND.	
pin 12:CF1	: IN : 13.5MHz crystal input, main clock	
pin 13:CF2	: O : 13.5MHz crystal output, main clock	
pin 14:VDD	: - : Positive supply voltage, connect to 5V	
pin 15:N.C	: O : Not in use.	
pin 16:N.C	: O : Not in use.	
pin 17:N.C	: IN : Not in use.	
pin 18:S-METER	: IN : RDS S-METER signal input.	
pin 19:NOISE	: IN : RDS noise signal input.	
pin 20:KEY_A/D	: IN : Input terminal of A/D converter for key judgement.	
pin 21:AMP_MUTE	: O : Muting signal output to internal audio power amplifier.	
pin 22:N.C	: IN : Connect to GND.	
pin 23:N.C	: IN : Connect to GND.	
pin 24:MODEL_INT3	: IN : The destination setting input.	
pin 25:TEXT PORT	: O : For CD text pin, Hi=OK, Lo=NG.	
pin 26:CD_DI	: O : Connect to LC786920 DI pin.	
pin 27:CD_DO	: IN : Connect to LC786920 DO pin.	
pin 28:CD_CLK	: - : Connect to LC786920 CLK pin.	
pin 29:CD_CE	: O : The chip enable signal output to LC786920.	
pin 30:CD_MUTE	: IN : Connect to LC786920 CD_MUTE pin.	
pin 31:CD_RST	: O : Connect to LC786920 REST pin.	
pin 32:IF_REQ	: O : The tuner pack IF buffer control signal output.	
pin 33:SUB_RDY	: IN : Connect to USB_READY pin.	
pin 34:REG_RDY	: IN : Connect to REG_READY pin.	
pin 35:CD_INSW1	: IN : Connect to CD MECHA SW1.	
pin 36:CD_INSW2	: IN : Connect to CD MECHA SW2.	
pin 37:CD_DMUTE	: O : Connect to CD driver IC MUTE pin.	
pin 38:CD_S/L	: O : Connect to CD driver IC VIN-SW pin.	
pin 39:VSS	: - : Connect to GND.	
pin 40:VDD	: - : Positive supply voltage, connect to 5V.	
pin 41:CD_ERROR	: IN : Connect to CD_ERROR pin.	
pin 42:CD_LIMIT_SW	: IN : Inside limit switch signal input.	
pin 43:CD_EM	: O : CD eject signal output for CD driver IC. CD_LM="L", CD_EM="H"	
pin 44:CD_LM	: O : CD loading signal output for CD driver IC. CD_LM="H", CD_EM="L"	
pin 45:RDS_NOISE_DCHG	: O : RDS noise discharge signal output.	
pin 46:RDS_MUTE	: O : RDS mute signal output.	
pin 47:SYS_MUTE	: O : System mute signal output.	
pin 48:N.C	: O : Not in use.	
pin 49:LCD_DI	: O : Connect to LCD driver IC DI pin	
pin 50:LCD_DO	: IN : Connect to LCD driver IC DO pin	
pin 51:LCD_CLK	: - : The clock pulse output to the LCD driver IC.	
pin 52:LCD_CE	: O : The chip enable signal output to the LCD driver IC.	
pin 53:EVOL_DATA	: I/O: The serial data output to the volume IC.	
pin 54:EVOL_CLK	: O : Clock pulse output to the volume IC.	
pin 55:VDD	: - : Positive supply voltage, connect to 5V.	
pin 56:VSS	: - : Connect to GND.	
pin 57:INT_1	: IN : The destination setting input.	
pin 58:INT_2	: IN : The destination setting input.	
pin 59:VER_1	: IN : Preference voltage input for A/D converter.	
pin 60:VER_2	: IN : Preference voltage input for A/D converter.	
pin 61:N.C	: IN : Connect to GND.	
pin 62:N.C	: IN : Connect to GND.	
pin 63:N.C	: IN : Connect to GND.	
pin 64:N.C	: IN : Connect to GND.	
pin 65:N.C	: IN : Not in use.	
pin 66:N.C	: O : Not in use.	
pin 67:N.C	: IN : Not in use.	
pin 68:DISP_Rem	: O : The power supply control signal output for LCD power and LCD backlight.	
pin 69:ILL_Rem	: O : The power supply control signal output for illumination.	
pin 70:KEY_INT	: IN : Key interrupting signal input.	
pin 71:INT_AMPREM	: O : ON signal output to the internal amplifier.	
pin 72:AMP_Remout	: O : The control signal output to internal audio power amplifier.	

pin 73:AUTO_ANT	: O : Motor antenna control signal output.	
pin 74:PHONE_INT	: IN : The telephone interrupt signal input.	
pin 75:RDS_TEST 1	: O : The power supply ON signal output for the	
pin 76:RDS_TEST 2	: IN : For debug when RDS TEST.	
pin 77:N.C	: O : Not in use.	
pin 78:N.C	: IN : Not in use.	
pin 79:JOG_CW	: IN : JOG key signal input.	
pin 80:JOG_CCW	: IN : JOG key signal input.	
pin 81:CD_TEST	: O : For CD mecha test pin.	
pin 82:ILL_DET	: IN : Illumination ON signal input.	
pin 83:CTRL	: O : Power supply ON signal input.	
pin 84:OFFSET_DET	: IN : The emergency signal input from the power IC.	
pin 85:RDS_TEST_DSR	: IN : The communication control signal input for RDS PC test.	
pin 86:RDS_TEST_DTR	: O : The communication control signal output for RDS PC test.	
pin 87:VERG	: O : The reference voltage.	
pin 88:VSS	: - : Connect to GND.	
pin 89:VDD	: - : Positive voltage supply, connect to 5V.	
pin 90:OSC_FM/AM	: IN : FM/AM oscillation input.	
pin 91:N.C	: IN : Connect to GND.	
pin 92:FM/AM_IFC	: IN : FM/AM IF signal input.	
pin 93:N.C	: IN : Connect to GND.	
pin 94:EO	: O : PLL phase compare ERROR output.	
pin 95:SUBPD	: O : For high speed lock up.	
pin 96:FM ON	: O : The power supply control signal output for tuner FM+B.	
pin 97:AM ON	: O : The power supply control signal output for tuner AM+B.	
pin 98:MUTE_SPEED_UP	: O : Station detection speed up command output for RDS.	
pin 99:FM-ST/SD	: IN : At receiving the FM station, this port detects the stereo signal. At seeking or scanning, this port detects the station detection signal.	
pin100:RDS_DATA	: IN : RDS serial data input.	
051-6743-00	LC786920E	CMOS LSI for compact disc player
Terminal Description		
pin 1 :EFMIN	: IN : RF signal input terminal.	
pin 2 :RFOUT	: O : RF signal output terminal.	
pin 3 :LPF	: O : RF signal DC label detection LPF capacitor connection terminal.	
pin 4 :PHLPF	: O : Wound detection LPF capacitor connection terminal.	
pin 5 :AIN	: IN : A signal input terminal.	
pin 6 :CIN	: IN : C signal input terminal.	
pin 7 :BIN	: IN : B signal input terminal.	
pin 8 :DIN	: IN : D signal input terminal.	
pin 9 :SLCSET	: IN : SLCO output Resistance connection terminal.	
pin 10:RFMON	: O : Inside LSI analog signal monitor terminal.	
pin 11:VREF	: O : VREF voltage output terminal.	
pin 12:JITTC	: O : Getta detection capacitor connection terminal.	
pin 13:EIN	: IN : E signal input terminal.	
pin 14:FIN	: IN : F signal input terminal.	
pin 15:PCNCNT	: IN : EFM PLL Charge Pump Control voltage input terminal.	
pin 16:TE OUT	: O : TE signal output terminal.	
pin 17:TE IN	: IN : TES signal generation input terminal.	
pin 18:LDL	: O : Laser power control signal output terminal.	
pin 19:LDS	: IN : Laser power control signal input terminal.	
pin 20:AVSS	: - : Connect to GND.	
pin 21:AVDD	: - : Analogue power supply terminal.	
pin 22:FDO	: O : Focus signal output terminal. D/A output.	
pin 23:TDO	: O : Tracking signal output terminal. D/A output.	
pin 24:SLDO	: O : Thread signal output terminal. D/A output.	
pin 25:SPDO	: O : Spindle signal output terminal. D/A output.	
pin 26:VVSSI	: - : Connect to GND.	
pin 27:PDOUT1	: O : Built-in VCO control phase comparison output terminal 1.	
pin 28:PDOUT0	: O : Built-in VCO control phase comparison output terminal 0.	
pin 29:PCKIST	: IN : PDOUT0 output 1 Resistance connection terminal.	
pin 30:VVDD1	: - : Connect to GND.	
pin 31:DMUTEB	: O : Not in use.	
pin 32:PUIN	: I/O: PUIN input output terminal.	
pin 33:DEFECT	: O : Wound detection signal output terminal.	
pin 34:FSEQ	: O : Synchronous signal output terminal, It becomes "H" when Synchronous Idle detected from the EFM signal is corresponding to Synchronous Idle of internal generation.	
pin 35:C2F	: O : C2 error signal output terminal.	
pin 36:DVDD	: - : Digital system power supply terminal.	
pin 37:DVSS	: - : Digital system earth terminal, Must connect to 0V.	

pin 38 : DVDD15	: O : Digital circuit power source capacitor earth terminal.
pin 39 : VVDD3	: - : Building PLL into power supply terminal.
pin 40 : VVSS3	: - : Connect to GND.
pin 41 : DVDD	: - : Digital system power supply terminal.
pin 42 : DVSS	: - : Digital system earth terminal, Must connect to 0V.
pin 43 : CE	: IN : Host IF:Enable signal input terminal.
pin 44 : CL	: IN : Host IF:Data transfer clock input terminal.
pin 45 : DIN	: IN : Host IF:Data input terminal.
pin 46 : DO	: O : Host IF:Data output terminal. (Nch opening drain output) The external of the Pull-Up resistance is necessary.
pin 47 : RESB	: IN : LIS reset input terminal. Once you turn on the power supply , It turn to "L".
pin 48 : REG_READYO	: O : Host IF:REG_READY output. (Nch opening drain output) The external of the Pull-Up resistance is necessary.
pin 49 : SUB_READYO	: O : Host IF:SUB_READYSY output. (Nch opening drain output) The external of the Pull-Up resistance is necessary.
pin 50 : CD_MUTE0	: I/O: Output L fixation after reset is released. Host IF:CD_MUTE request output. (Nch opening drain output) The external of the Pull-Up resistance is necessary.
pin 51 : LOW_BAT1	: I/O: Host IF:Standby control input.
pin 52 : CONT	: I/O: Connect to GND.
pin 53 : MODE	: IN : Setting Input terminal, Must connect to DVDD.
pin 54 : STREQ	: I/O: Stream data demand signal output terminal.
pin 55 : STCK	: I/O: Stream data bit clock input terminal.
pin 56 : STDATA	: I/O: Stream data input terminal.
pin 57 : TEST	: IN : Connect to GND.
pin 58 : DATA	: O : Lch/Rch channel data output terminal.
pin 59 : DATAACK	: O : Bit clock output terminal.
pin 60 : LRSY	: O : Lch/Rch clock output terminal.
pin 61 : VVDD2	: - : Building VCO into Power supply terminal.
pin 62 : VPREF2	: IN : Building VCO into oscillation cooking stove setting input terminal.
pin 63 : VCOC2	: IN : Building VCO into Control setting voltage terminal.
pin 64 : VPDOUT2	: O : Building VCO into control output terminal.
pin 65 : VVSS2	: - : Building VCO into earth terminal, Must connect to 0V.
pin 66 : DVDD15	: O : Digital circuit power source capacitor earth terminal.
pin 67 : DVSS	: - : Digital system power supply terminal, Must connect to 0V.
pin 68 : DVDD	: - : Digital system power supply terminal
pin 69 : DOUT	: O : Digital output terminal, EIAJ format.
pin 70 : AMUTE0	: O : CD_MUTE0 signal output terminal.
pin 71 : XVSS	: - : Connect to GND.
pin 72 : XOUT	: O : 16.9344MHz departure pendulum Connected terminal.
pin 73 : XIN	: IN : 16.9344MHz departure pendulum Connected terminal.
pin 74 : XVDD	: - : Oscillation circuit Power supply terminal.
pin 75 : LRVDD	: - : LR channel power supply terminal.
pin 76 : LCHO	: O : L channel output terminal.
pin 77 : LRREF	: O : LR channel Reference output terminal.
pin 78 : RCHO	: O : R channel output terminal.
pin 79 : LRVSS	: - : Connect to GND.
pin 80 : SLCO	: O : Slice label control output terminal.
pin 12 : S12	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 13 : S13	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 14 : S14	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 15 : S15	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 16 : S16	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 17 : S17	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 18 : S18	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 19 : S19	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 20 : S20	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 21 : S21	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 22 : S22	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 23 : S23	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 24 : S24	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 25 : S25	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 26 : S26	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 27 : S27	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 28 : S28	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 29 : S29	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 30 : S30	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 31 : S31	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 32 : S32	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 33 : S33	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 34 : S34	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 35 : S35	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 36 : S36	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 37 : S37	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 38 : S38	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 39 : COM4/S39	: O : Common driver outputs.
pin 40 : COM3	: O : Common driver outputs.
pin 41 : COM2	: O : Common driver outputs.
pin 42 : COM1	: O : Common driver outputs.
pin 43 : KS1/S40	: O : Key scan outputs.
pin 44 : KS2/S41	: O : Key scan outputs.
pin 45 : KS3/S42	: O : Key scan outputs.
pin 46 : KS4	: O : Key scan outputs.
pin 47 : KS5	: O : Key scan outputs.
pin 48 : KS6	: O : Key scan outputs.
pin 49 : KI1	: IN : Key scan inputs.
pin 50 : KI2	: IN : Key scan inputs.
pin 51 : KI3	: IN : Key scan inputs.
pin 52 : KI4	: IN : Key scan inputs.
pin 53 : KI5	: IN : Key scan inputs.
pin 54 : VDD	: - : Logic block power supply connection.
pin 55 : VLCD	: - : LCD driver block power supply connection.
pin 56 : VLCD1	: IN : Used for applying the LCD drive 2/3 bias voltage externally.
pin 57 : VLCD2	: IN : Used for applying the LCD drive 1/3 bias voltage externally.
pin 58 : VSS	: - : Power supply connection. Connect to ground.
pin 59 : TEST	: IN : This pin must be connected to ground.
pin 60 : OSC	: I/O: The OSC pin can be used to form an oscillator circuit with an external resistor and an external capacitor.
pin 61 : DO	: O : Serial data interface connections to the controller.
pin 62 : CE	: IN : Serial data interface connections to the controller.
pin 63 : CL	: IN : Serial data interface connections to the controller.
pin 64 : DI	: IN : Serial data interface connections to the controller.

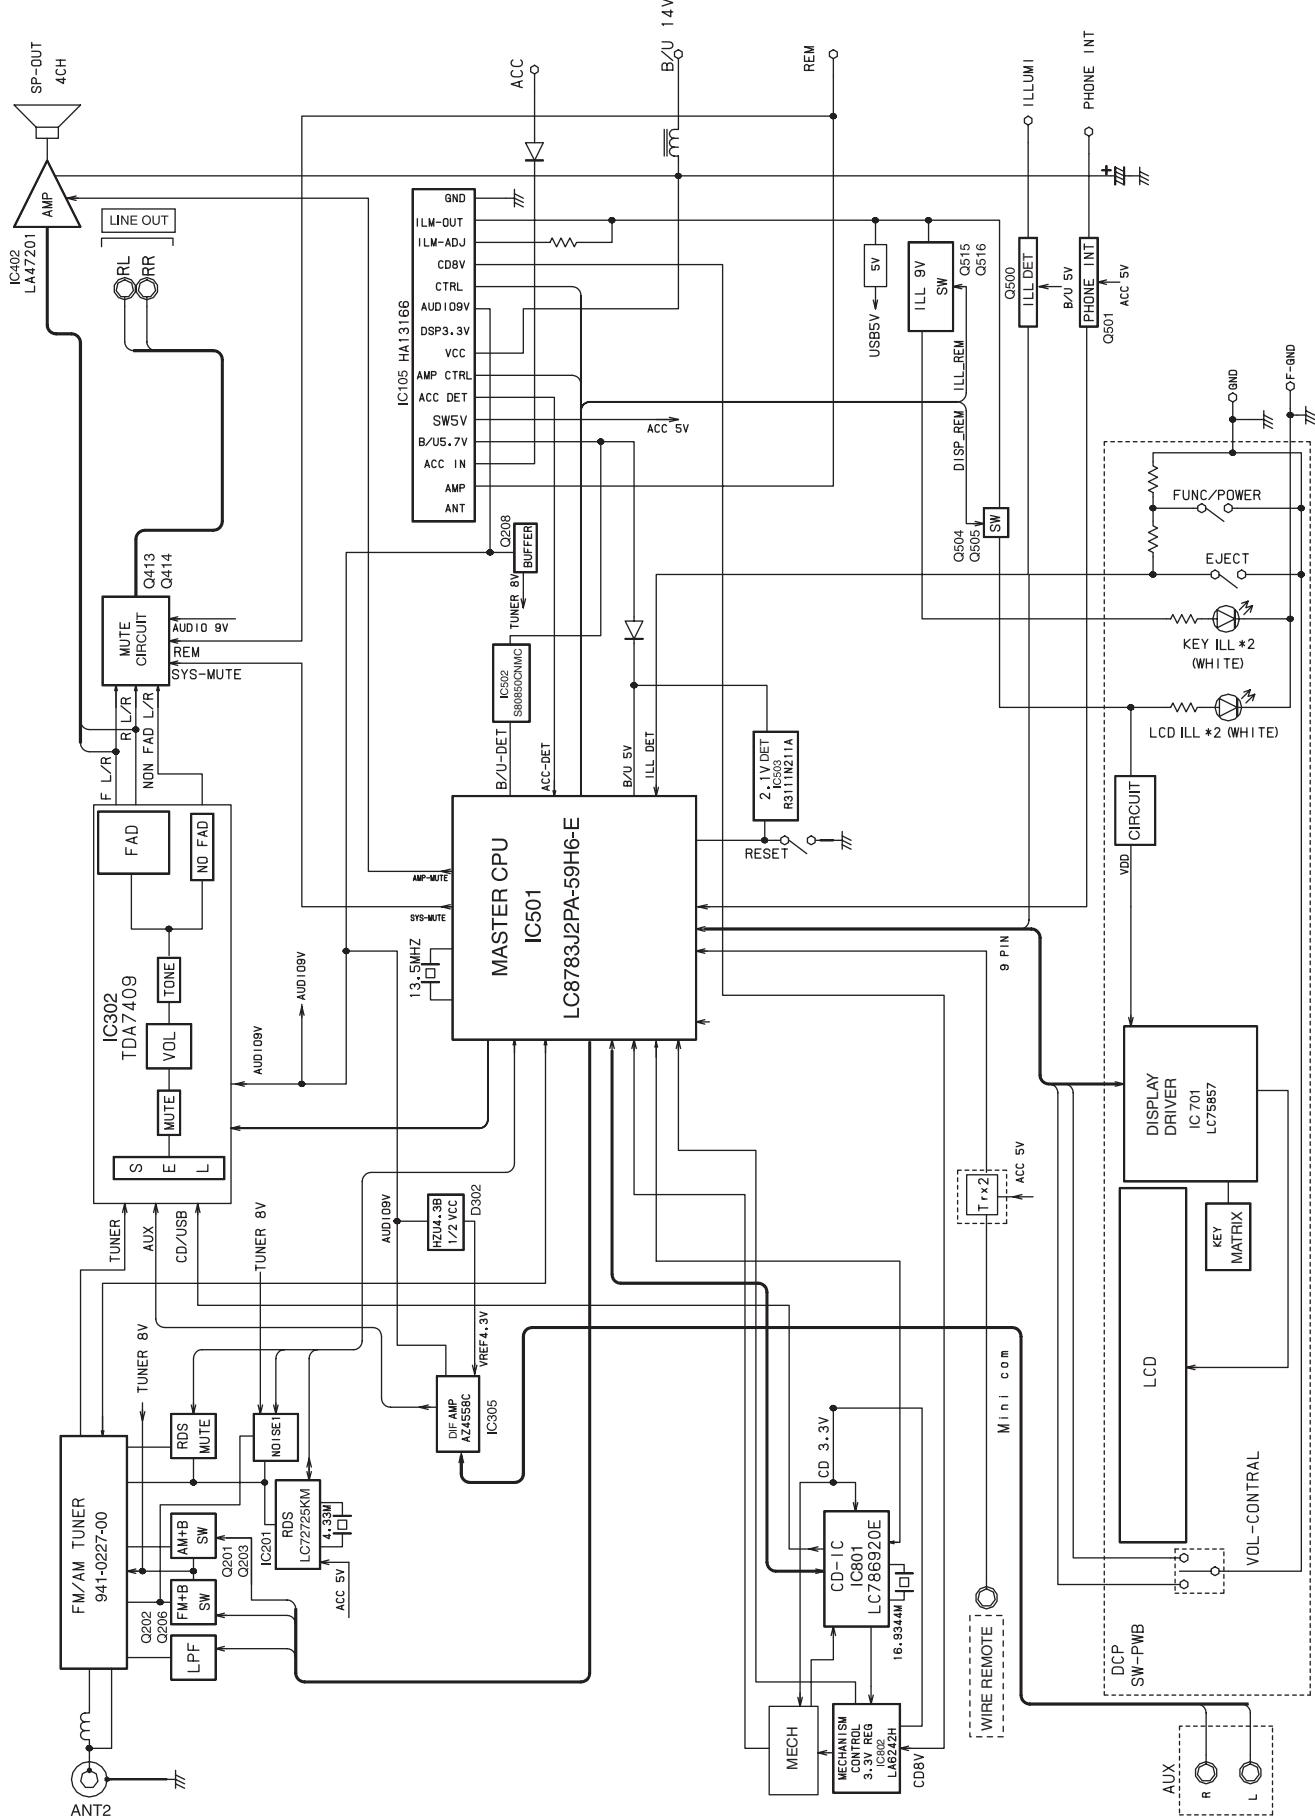

051-6095-00 LC75857W CMOS IC 1/3, 1/4 Duty LCD Display Drivers with Key Input Function

Terminal Description

pin 1 : P1/S1	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 2 : P2/S2	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 3 : P3/S3	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 4 : P4/S4	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 5 : S5	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 6 : S6	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 7 : S7	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 8 : S8	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 9 : S9	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 10 : S10	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 11 : S11	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 12 : S12	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 13 : S13	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 14 : S14	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 15 : S15	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 16 : S16	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 17 : S17	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 18 : S18	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 19 : S19	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 20 : S20	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 21 : S21	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 22 : S22	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 23 : S23	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 24 : S24	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 25 : S25	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 26 : S26	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 27 : S27	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 28 : S28	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 29 : S29	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 30 : S30	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 31 : S31	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 32 : S32	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 33 : S33	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 34 : S34	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 35 : S35	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 36 : S36	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 37 : S37	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 38 : S38	: O : Segment outputs for displaying the display data transferred by serial data input.
pin 39 : COM4/S39	: O : Common driver outputs.
pin 40 : COM3	: O : Common driver outputs.
pin 41 : COM2	: O : Common driver outputs.
pin 42 : COM1	: O : Common driver outputs.
pin 43 : KS1/S40	: O : Key scan outputs.
pin 44 : KS2/S41	: O : Key scan outputs.
pin 45 : KS3/S42	: O : Key scan outputs.
pin 46 : KS4	: O : Key scan outputs.
pin 47 : KS5	: O : Key scan outputs.
pin 48 : KS6	: O : Key scan outputs.
pin 49 : KI1	: IN : Key scan inputs.
pin 50 : KI2	: IN : Key scan inputs.
pin 51 : KI3	: IN : Key scan inputs.
pin 52 : KI4	: IN : Key scan inputs.
pin 53 : KI5	: IN : Key scan inputs.
pin 54 : VDD	: - : Logic block power supply connection.
pin 55 : VLCD	: - : LCD driver block power supply connection.
pin 56 : VLCD1	: IN : Used for applying the LCD drive 2/3 bias voltage externally.
pin 57 : VLCD2	: IN : Used for applying the LCD drive 1/3 bias voltage externally.
pin 58 : VSS	: - : Power supply connection. Connect to ground.
pin 59 : TEST	: IN : This pin must be connected to ground.
pin 60 : OSC	: I/O: The OSC pin can be used to form an oscillator circuit with an external resistor and an external capacitor.
pin 61 : DO	: O : Serial data interface connections to the controller.
pin 62 : CE	: IN : Serial data interface connections to the controller.
pin 63 : CL	: IN : Serial data interface connections to the controller.
pin 64 : DI	: IN : Serial data interface connections to the controller.
