# Specifications

## FM RADIO

Intermediate Frequency	10.7 ± 0.1MHz
Frequency Range	87.5~108MHz
Usable Sensitivity (Mono at 98.1MHz)	17.2dBf
Limiting Sensitivity (-10dB, at 98.1MHz)	19.2dBf
S/N Ratio (Stereo at 98.1MHz)	56dB
Image Rejection (at 106.1MHz)	40dB
IF Rejection (at 90.1MHz)	60dB
Distortion (Input 1mV at 98.1MHz)	1%
Frequency Response (Ref. 400Hz, at 98.1MHz)	100Hz: 0 ± 3dB 10kHz: -12 ± 3dB
Stereo Separation (98.1MHz)	20dB
SK Sensitivity (98.1MHz)	25.2dBf
PS Sensitivity (98.1MHz)	36.2dBf
TP Sensitivity (98.1MHz)	36.2dBf

## MW RADIO

Intermediate Frequency	450kHz
Frequency Range	531~1,602kHz
Usable Sensitivity (20dB S/N, at 999kHz)	34dB
S/N Ratio (at 999kHz)	44dB
Image Rejection (at 1,404kHz)	50dB
IF Rejection (at 603kHz)	60dB
Distortion (at 999kHz)	1.5%
Frequency Response (Ref. 400Hz, at 999kHz)	100Hz: -3 ± 4dB 4kHz: -12 + 6, -12dB

## LW RADIO

Intermediate Frequency	450kHz
Frequency Range	153~281kHz
Usable Sensitivity (20dB S/N, at 216kHz)	41dB
S/N Ratio (at 216kHz)	42dB
Image Rejection (at 270kHz)	40dB
IF Rejection (at 162kHz)	50dB
Distortion (at 216kHz)	1.5%
Frequency Response (Ref. 400Hz, at 216kHz)	100Hz: -3 ± 4dB 4kHz: -12 + 6, -12dB

## TAPE PLAYER

Wow & Flutter (JIS WRMS, MTT-111N)	0.2%
Tape Speed (MTT-111N)	4.76cm/sec. +3 to -1%
S/N Ratio (MTT-212N)	Dolby OFF: 52dB Dolby B: 58dB Dolby C: 65dB (●)
Distortion (MTT-118N)	2%
Frequency Response (Ref. 1kHz, MTT-256)	63Hz: -3dB 12.5kHz: -3dB
Separation (MTT-141N)	35dB
Crosstalk (MTT-121N)	45dB
FF & REW Time (C-60)	15sec.

**GENERAL**

Power Supply .....	DC14.4V
Power Output / Impedance .....	11W / ch / 4ohm (○) 14W / ch / 4ohm (●)
Output Voltage / Impedance .....	1V / 10kohm
Semiconductors .....	34 IC's, 66 Transistors, 28 Diodes, 7 Zener Diodes (○) 38 IC's, 70 Transistors, 31 Diodes, 7 Zener Diodes (●)
Dimensions (W×H×D) .....	Chassis : 178 × 50 × 153 mm Nose : 171 × 48 × 22 mm
Weight .....	1.6kg

**NOTE :** Due to Continuing product improvement, specifications and designs are subject to change without notice.

○ : For 7524R Model Only, ● : For 7525R Model Only, Others : Common

**ERROR INDICATION FOR CD SHUTTLE**

INDICATION	CAUSE	SOLUTION
<b>ERROR-01</b>	Disc-change malfunction.	Consult your Alpine dealer.
	Disc-change malfunction.	Press the magazine eject button and pull out the Magazine. Check for error indication. Insert the magazine again. If the magazine can not be pulled out, consult your Alpine dealer.
	Magazine ejection impossible.	Press the magazine eject button. If the magazine does not eject, consult your Alpine dealer.
<b>ERROR-02</b>	Disc is in player mechanism.	Press the magazine eject button, and insert an empty magazine.
<b>---H</b>	High Temperature.	Will disappear when the temperature returns to operation range.
<b>EEEE</b>	Misconnection or disconnection of CD Shuttle.	Check connection between CD Shuttle and control unit.

**INDICATION FOR 7525R/7524R**

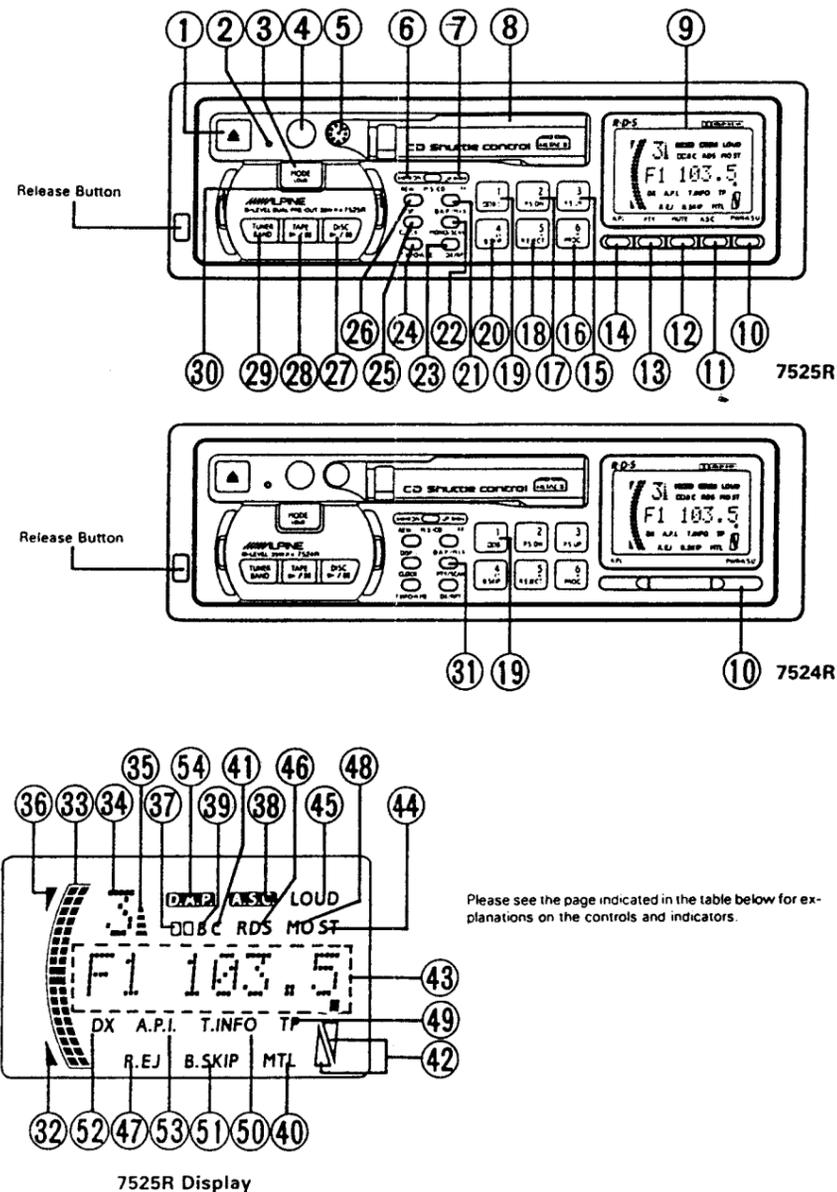

INDICATION	MEANING
<b>NO MAGZN</b>	The magazine is not installed into the CD Shuttle.
<b>NO DISC</b>	No discs are in the magazine.

## FEATURES

- **FULL FRONT DIN™ CHASSIS**
- **CD SHUTTLE™ CONTROL**
- **D.F.P. (DETACHABLE FRONT PANEL)**
- **GR-HIGH PRECISION/LOW NOISE FULL LOGIC**
- **WIRELESS REMOTE CONTROL CAPABILITY**
- **A.S.C. (AMBIENCE SOUND COMPENSATOR) (7525R only)**  
A.S.C. detects the noise, which changes according to the vehicle's speed and the road conditions. Thanks to fuzzy logic, which makes judgments that closely parallel those of a human, A.S.C. maintains the volume and tone settings at a comfortable level.
- **A.S.U. (AUTOMATIC SET-UP)**  
Returns the unit to a factory preset condition. This includes setting the Tone controls flat, FADER and BALANCE centered, and placing the unit in the Tuner mode tuned to the strongest station in the area.
- **HLTAC II™ TAPE HEAD**  
Alpine's proprietary HLTAC II tape head features Oxygen Free Copper (OFC) coil windings to prevent low level signal loss and corrosion. It also features a super-close-tolerance, extremely narrow 0.8 micron head gap for exceptionally flat and accurate frequency response.
- **P.S. (PROGRAM SENSOR)**  
Program Sensor allows skipping up to 9 tracks on the tape in either forward or reverse directions.
- **A.P.I. (AUTO PROGRAM IDENTIFICATION)**  
While A.P.I. function turns on in the FM mode, a best receptive RDS station which has same program as the station you are receiving automatically can be received.
- **T. INFO (TRAFFIC INFORMATION)**  
While T. INFO function turns on, a traffic information service automatically can be received when a station transmit.
- **D.A.P. (DIRECT ACCESS PRESETS)**
- **A. MEMO (INTELLIGENT AUTO MEMORY)**
- **REPEAT (TAPE, CD)**
- **SCAN (TAPE, CD)**
- **BLANK SKIP**
- **DOLBY® B/C NOISE REDUCTION**
- **S.T.M. (SOURCE TONE MEMORY)**  
Automatically memorizes the settings of your Bass/Treble Controls for each source.
- **DUAL PRE-AMP OUTPUTS**  
Dual pre-amp outputs, along with a pre-amp fader, make easy and complete system expansion possible.
- **SELECTABLE FADER**
- **DUAL ILLUMINATION**
- **LITETOUCH™ 30-STATION PRESETS**  
FM1 : 6, FM2 : 6, MW : 6, LW : 6, D.A.P.: 6

## OPERATION

### ● BASIC OPERATION

#### Initial System Start

When operating the system for the first time after installation or after the vehicle's battery has been disconnected and reconnected, set the volume level to its minimum, then carefully press the Reset switch ② with a sharp pencil or any other pointed object.

#### How to adjust the volume and tone (Refer to the diagram in next page.)

1. Turn On the system by pressing the PWR switch ⑩ or any other button (other than Eject ① or Reset ②).
2. Press the Audio MODE Select switch ③ to select each adjusting mode.

- Each time this switch is pressed, the mode changes. The mode is indicated in the display. The mode indicator changes as each mode is selected.
3. Once the desired mode appears in the display, use the Audio Controller ⑭ to make your adjustment. The Audio Control Up indicator ⑮ flashes when turned clockwise and the Down indicator ⑯ flashes when turned counterclockwise.

#### Power Off

Press the PWR button ⑩ to turn the unit Off.

#### Loudness

1. Press the LOUD button ③ for more than 2 seconds to activate the loudness function.
2. Press the LOUD button ③ for more than 2 seconds again to defeat this feature.

#### Mode Switching of the 7525R/7524R

1. Radio Mode  
Press the BAND button ③ to put the unit into the radio mode. The Band indicator (F1, F2 or MW/LW) will appear in the display.
2. Cassette Player Mode  
Press the TAPE button ④ to put the unit into the cassette player mode.
3. CD Shuttle Mode  
Press the DISC button ⑦ to put the unit into the CD mode.

#### Five Modes Setting Function

This unit allows setting of five modes shown below. For further details, refer to the description on each mode.

- Preset No. 1: FM level switching.
- Preset No. 2: Sound volume setting during reception of traffic information.
- Preset No. 3: Switching of automatic tracing function. (A.P.I. 1/A.P.I. 2/PS ONLY)
- Preset No. 4: Regional program on/off switching.
- Preset No. 5: Built-in lighting switch function (green/amber).

## OPERATION

### Audio Controller Operation

OPERATION	IND	SPEED OF CHANGE	VOLUME	TREBLE	BASS	BALANCE	FADER
		FAST	UP	BOOST	BOOST	Left-ch Decreases	Rear-ch Decreases
		SLOW	UP	BOOST	BOOST	Left-ch Decreases	Rear-ch Decreases
		NO CHANGE					
		SLOW	DOWN	CUT	CUT	Right-ch Decreases	Front-ch Decreases
		FAST	DOWN	CUT	CUT	Right-ch Decreases	Front-ch Decreases

#### S.T.M. (Source Tone Memory)

The Bass and Treble controls can be individually set for each source (FM, MW/LW, Tape, and CD). Once set, their positions are automatically memorized. Whenever the source is reselected, the Bass and Treble controls will return to your preset configuration.

#### Mute (7525R only)

1. Press the MUTE button ⑫ to reduce instantly the sound level by 20 dB. When the mute mode is set, part of the bar graph ⑬ and the audio control direction of rotation indicator ⑮ or ⑯ flash.
2. To release the mute function, press the MUTE button ⑫ a second time.

#### Switching the Lighting Color

Lighting colors (green/amber) for the front panel can be changed.

1. Press the DISP button ⑰ for 3 seconds.
2. Press the Preset No. 5 button ⑤ to switch the lighting between green and amber.

## OPERATION

### A.S.C. (Ambience Sound Compensator) (7525R only)

The A.S.C. detects the ultra-low and medium low frequency noise which changes according to the vehicle's speed and road conditions, and controls the volume and tone using judgments near those of the human senses thanks to fuzzy logic to keep the settings at a comfortable level.

1. Play the radio, a cassette or a CD and adjust the volume and tone as desired.
2. Press the A.S.C. button ⑱. The A.S.C. function is activated and the volume and tone are controlled automatically.
3. To release the A.S.C. function, press the A.S.C. button ⑱ a second time.

### Switching the A.S.C. Mode (7525R only)

A.S.C. includes three different sensitivity settings to keep the 7525R's output audible above the ambient noise level (caused by the road noise and speed of the vehicle). The different levels as indicated in the display are, in decreasing order, A.S.C. 1, A.S.C. 2, A.S.C. 3.

1. Press the A.S.C. button ⑱ for two seconds.
2. "A.S.C. 1" is indicated on the display, and the mode changes each time the button is pressed.

#### NOTE:

The A.S.C. mode can be switched even if the A.S.C. function is not activated.

#### Automatic Set Up

All the bothersome initialization procedures required after installation are conducted automatically.

1. With the power turned On, press the Power Off/Auto Set Up button ⑩ for 3 seconds. The following procedures are conducted automatically.
2. "A.S.U." flashes three times on the dot matrix display ⑲.
3. The unit is set to the D.A.P. mode and stations are automatically stored in the memory.
4. The treble, bass, balance and fader settings are all set to the center. The various modes and levels are indicated on the dot matrix display ⑲ and bar graph ⑬.
5. The volume gradually increases.
6. The A.S.U. operation is completed.

## OPERATION

### ● RADIO OPERATION

#### Tuning Band Selection

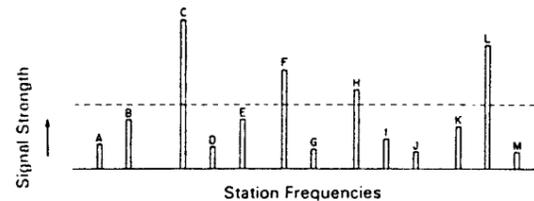

Press the BAND button  $\text{Ⓢ}$  to select the desired tuning band. The Band indicator shows your selection.

#### Local/Distance (DX) Seek Sensitivity for FM, MW and LW

You can select the radio seek sensitivity (local or distance (DX)), by pressing the DX (distance) button  $\text{Ⓣ}$ .

In the local mode, with no DX indicator  $\text{Ⓣ}$ , the radio tunes in only strong stations (stations C, F, H and L in the illustration below).

In the distance mode, with DX indicator  $\text{Ⓣ}$ , the radio tunes in both strong and weak stations (all stations from A to M in the illustration).

#### FM Stereo/Monaural Switching (7525R only)

You can select between the auto switching or monaural only modes for FM reception by pressing the MONO button  $\text{Ⓢ}$ . In the auto switching mode, you can receive stereo broadcasts in stereo and monaural broadcasts in MONO. In the monaural mode, you will receive the broadcast in monaural only, even if the broadcast is in stereo. The monaural only mode quiets the noisy stereo signal of weaker broadcasts. The ST indicator  $\text{Ⓢ}$  will not appear while the monaural mode is selected.

#### Manual and Auto Seek Tuning

Stations can be tuned in using the procedures described below.

1. Select the tuning band (FM1, FM2, MW or LW) with the BAND button  $\text{Ⓢ}$ . The Band indicator shows your selection.

2. Decreasing the frequency:

The frequency is decreased by one step each time the DN switch  $\text{Ⓢ}$  is pressed. By pressing and holding the switch for at least 0.5 seconds, the unit will automatically tune the first station it finds in the direction of decreasing frequency.

3. Increasing the frequency:

The frequency is increased by one step each time the UP switch  $\text{Ⓢ}$  is pressed. By pressing and holding the switch for at least 0.5 seconds, the unit will automatically tune to the first station it finds in the direction of increasing frequency.

## OPERATION

### Preset Memory Programming

Follow the instructions below to program stations in to preset memory:

1. Select the tuning band (FM1, FM2, MW or LW) with the BAND button  $\text{Ⓢ}$ .
2. Tune in your desired station using manual or auto seek tuning.
3. Press the Preset button number 1  $\text{Ⓢ}$  for more than 2 seconds.
4. The preset indicator  $\text{Ⓢ}$  and the dot matrix display  $\text{Ⓢ}$  will begin to blink. Press that Preset button again while the display is blinking (within 5 seconds).
5. The frequency you selected will be placed into preset memory number 1 and will appear in the display.

#### NOTE:

If a preset memory has already been set in the same address, it will be cleared and the new station will be memorized.

6. Follow steps 2 – 4 for the remaining presets (2 – 6). Use this procedure for FM1, FM2, MW and LW.

### Auto Memory Preset

1. Select the desired tuning band (FM1, FM2, MW or LW) with the BAND button  $\text{Ⓢ}$ . The Band indicator shows your selection.

#### NOTE:

The auto memory preset procedure is allowed in the D.A.P. mode.

2. Press the A. ME button  $\text{Ⓢ}$  for over 2 seconds.
3. The tuner will automatically seek the 6 strongest stations in the selected band and memorize them in order of their signal strength. These stations are automatically placed in the preset memory with the strongest station in preset No. 1 and the 6th strongest station in preset No. 6. When seeking stations, the tuner first seeks in the local tuning mode. If less than 6 stations are memorized, the tuner seeks again in the distance (DX) mode.
4. After finishing the auto memory preset, the tuner goes to the station placed in preset memory No. 1. If no stations are memorized, it returns to the original station you were listening to before the auto memory preset procedure began.

### Preset Tuning

After the preset stations have been memorized, you can tune in your desired station (within the band displayed) with one touch of a button.

1. Select the tuning band (FM1, FM2, MW or LW) with the BAND button  $\text{Ⓢ}$ .
2. Press any one of the Preset buttons ( $\text{Ⓢ}$  –  $\text{Ⓢ}$ ) and the number of that preset will appear in the preset channel indicator  $\text{Ⓢ}$ .
3. The frequency of the station placed in the selected preset location will appear in the display.

### D.A.P. (Direct Access Preset)

This feature allows the storage of FM, MW and LW presets on the same band.

1. Press the D.A.P. button  $\text{Ⓢ}$  to light up the D.A.P. indicator  $\text{Ⓢ}$ .
2. To program stations into the D.A.P. band, follow steps 1 – 4 as described in the Preset Memory Programming section above.

### Accessing the D.A.P. Presets

1. Press the D.A.P. button  $\text{Ⓢ}$ . The D.A.P. indicator  $\text{Ⓢ}$  will illuminate in the display.
2. Press one of the Preset buttons ( $\text{Ⓢ}$  –  $\text{Ⓢ}$ ).
3. The frequency of the station placed in the selected D.A.P. location will appear in the display.

### Switching the FM Volume

Use this function if the difference in volume is great when switching between a tape and the FM radio.

1. Press the DISP button  $\text{Ⓢ}$  for 3 seconds.
2. Press the Preset No. 1 button  $\text{Ⓢ}$  to switch the display between "FM-LV Hi" and "FM-LV Lo".

The FM volume can be set to one of two positions, high or low. Set the position according to the broadcast station.

## OPERATION

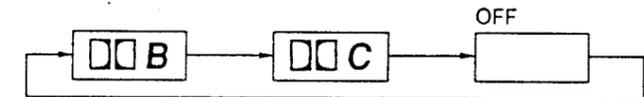

### ● TAPE PLAYER OPERATION

Turn the unit On and press the TAPE (▶/||) button  $\text{Ⓢ}$  to access the tape mode.

#### Dolby\* B/C Noise Reduction

Before playing a cassette tape, check to see if it is encoded with Dolby B or C noise reduction. Press the Dolby NR button  $\text{Ⓢ}$  when playing a Dolby NR encoded tape.

Press the Dolby NR button  $\text{Ⓢ}$  to select Dolby NR mode. The Dolby NR indicator  $\text{Ⓢ}$  and the B  $\text{Ⓢ}$  or C  $\text{Ⓢ}$  indicator shows your selection. The Dolby NR mode changes each time the button is pressed.

#### NOTE:

Only Dolby B is offered on the 7524R.

#### Cassette Loading

1. Insert a prerecorded cassette tape into the cassette loading slot  $\text{Ⓢ}$  with the open side facing to your right.
2. If the cassette tape is not completely loaded into the deck, lightly press the cassette into the slot.

#### Metal (MTL) Indicator

Metal or CrO<sub>2</sub> cassette tapes having an open detection hole will automatically be detected, in which case the MTL indicator  $\text{Ⓢ}$  in the display comes on and the playback equalization is automatically set to 70μsec.

#### Eject

Press the Eject button  $\text{Ⓢ}$  to eject the cassette from the tape mechanism.

#### Pause

To temporarily stop playback, press the TAPE (▶/||) button  $\text{Ⓢ}$ . To resume playback, press the same button again.

#### Playback

1. Insert a prerecorded cassette tape with the open side facing right. The playback begins immediately.
2. If a cassette tape is already loaded in the unit, press the TAPE (▶/||) button  $\text{Ⓢ}$  to start playback.
3. To stop tape play, press the Eject button  $\text{Ⓢ}$  or turn the power Off with the PWR switch  $\text{Ⓢ}$ .

#### NOTE:

Push the DISP button  $\text{Ⓢ}$  with the tape or CD played in the A.P.I. or T. INFO mode, and the unit will be set to the TUNER mode and the tuning is possible.

## OPERATION

### True Fast Forward and Rewind

1. Press the FF switch ⑦ to advance the tape quickly. Press the REW switch ⑥ to rapidly run the tape backward. The deck will perform these functions correctly regardless of the tape play direction.
2. To disengage the FF or REW function, press the TAPE (▶/II) button ②.

### Program Sensor

1. To advance the tape to the beginning of the next musical track, press and release the P.S. UP button ⑬. The display will show "P.S. UP + 1" as shown below. Successive pressing of this button will increase the number of tracks to be skipped as the tape advances. The number in the display will increase accordingly. For example, to go from track 1 to track 4, press the P.S. UP button ⑬ three times (the number in the display will be "+3"). The tape deck searches for blank sections between tracks to the beginning of track 4 and begins playback.
2. To access the beginning of the current musical track, press and release the P.S. DN button ⑭. The display will show "P.S. DN -1". Successive pressing of this button will increase the number of tracks to be skipped as the tape rewinds. The number in the display will increase (in the negative direction) accordingly. For example, to go from track 5 to track 4, press the P.S. DN button ⑭ twice (the number in the display will be "-2" as shown below). The tape deck searches for blank sections between tracks to the beginning of the track 4 and begins playback.

[Example]

P.S. UP +1

P.S. DN -2

### NOTE:

The P.S. cannot detect blank sections of less than 3 seconds.

### Auto Reverse

When the tape is played or fast-forwarded to the end, the tape transport automatically reverses the tape direction and playback begins.

### Manual Reverse

To manually change playback direction (switch between side A and side B), press the PROG button ⑩.

### Repeat

1. Insert the cassette tape and begin playback.
2. When you find a selection you would like to repeat, press the RPT button ⑮ until the REPEAT indicator appear in the display. This selection will be continuously repeated until the repeat function is disengaged.
3. To cancel the repeat function, press the RPT button ⑮ again. The REPEAT indicator will disappear.

## OPERATION

### Scan

1. Press the SCAN button ⑲ (⑳ for 7524R) and the deck will play the first 10 seconds of each selection. This feature is convenient when searching for a particular selection on a tape.
2. Once you have located your desired selection, press the SCAN button ⑲ again to defeat this function.

### Blank Skip

1. Press the B. SKIP button ㉑ during playback to skip over any blank sections of tape lasting 15 seconds or more.
2. To cancel the blank skip function, press the B. SKIP button ㉑ again.

### Return Eject

1. Insert the cassette tape and begin playback.
2. Press the R. EJECT button ㉒ during one of the following modes and the cassette tape will automatically eject when:
  - Playback mode; After both sides A and B have been played.
  - Fast Forward mode; After the other side has been played. The R. EJ indicator ㉓ on that button will light.
3. To cancel the return eject mode, press the R. EJECT button ㉒ again.

### Head Cleaning

When playback sound quality begins to deteriorate, it is time to clean the tape head. Insert a special head cleaning cassette into the tape deck and allow it to run for approximately 1 minute to remove any foreign matter. There are special cleaning cassettes that also clean the capstans and pinch rollers. Please contact your authorized Alpine dealer for information about these cleaning devices.

## OPERATION

### ● CD OPERATION

The following instructions apply only to systems that incorporate the Alpine CD Shuttle with 7525R/7524R.

Turn the unit On and access the CD mode by pressing the DISC (▶/II) button ㉔.

### Initial System Turn-On

When operating the system for the first time after installation or after the vehicle's battery has been disconnected and reconnected, press the Reset switch ㉕ with a sharp pencil or other pointed object.

### Normal Play

1. Press the DISC (▶/II) button ㉔.
2. The first disc will begin playback.
3. After the last track on the last disc is played back, the pickup will return to the beginning of the first track of the first disc and begin playback from that point.

### Pause

While the disc is playing, press the DISC (▶/II) button ㉔ to temporarily stop playback. The dot matrix display ㉖ will show "PAU". To resume playback, press the DISC button (▶/II) ㉔ again.

### Music Sensor (Skip)

This feature allows you to access the beginning of your musical track selection simply and quickly. It is functional in the play or pause mode. The dot matrix display ㉖ shows the track number you have selected.

- To advance to the next track on the disc, press the UP/FF switch ⑦.
  1. Playback stops, and the pickup moves up to the beginning of the next track. That track number appears in the dot matrix display ㉖.
  2. Playback begins immediately.
  3. If you wish to access a track further ahead on the disc, continue pressing and releasing the UP/FF switch ⑦ until you reach the track of your choice.
- To replay the track that is currently playing, press and release the DN/REW switch ⑥.
  1. Playback stops, and the pickup moves back to the beginning of the current track. The track number in the dot matrix display ㉖ remains the same.
  2. Playback begins immediately from the beginning of the track.
  3. If you access a track further towards the beginning of the disc, continue pressing and releasing the DN/REW switch ⑥ until you reach the track of your choice.

7524R/  
7525R7524R/  
7525R

## OPERATION

### Direct Disc Access

1. Press one of the Direct Disc Access buttons (15 - 20) to select from discs 1 - 6. The disc and track numbers will appear in the display.
2. Press the UP/FF 7 or DN/REW 6 switch for musical track selection.

### Fast Forward/Fast Backward

The fast forward/fast backward feature works in the play mode only.

1. Press either the FF 7 or the REW 6 switch and hold it down for more than 1 second.
2. To move the pickup forward rapidly, hold down the FF switch 7.
3. To move the pickup backward rapidly, hold down the REW switch 6.
4. Release the button when you get to the desired position on the disc.
5. When the pickup reaches the end of the disc, it will begin playback from the beginning of the first track on the next disc.

### Repeat (One/All)

This feature allows you to continuously repeat a single track or one entire disc.

#### To Repeat a Single Track

1. Locate the music track of your choice using the UP 7 or DN 6 switch.
2. Press the RPT button 23.  
The REPEAT indicator will illuminate on the dot matrix display 43.  
The music track will be played back repeatedly.
3. To stop repeat play, press the RPT button 23 twice.

#### To Repeat an Entire Disc

1. While playing a disc, press the RPT button 23 until the ALL indicator will illuminate.
2. The disc will be played back repeatedly.
3. To stop repeat play, press the RPT button 23 once. The indicator illumination will be off.

### Disc Scan

Press the SCAN button 22 (21 for 7524R) and the unit will playback the first 10 seconds of each track in succession. This function is useful in searching ahead on a disc for a specific selection. Pressing the SCAN button 22 a second time deactivates the function.

### M.I.X. (Random Play)

Press the M.I.X. button 21 while the unit is in the play or pause mode. Musical tracks on the selected disc will be played back in a random sequence generated by the microprocessor. After all the tracks on the disc have been played back once, the player will begin a new random sequence.

## OPERATION

### CD Display Switching

In the CD mode, the display will show the Disc and Track Number (Fig. A) or the Elapsed Time (Fig. B). Press the DISP button 25 to select between the Disc/Track number and the Elapsed Time indicators.

3  
TRACK - 07

Fig. A

3  
01 21 ' 09

Fig. B

### NOTE:

In the A.P.I. or T. INFO mode, even if the DISP button 25 is pushed, the display can not be switched. The mode will be set to the tuner mode and the tuning is possible.

### CLOCK OPERATION

#### RDS Clock

1. Press the CLOCK button 29. The clock time will appear on the display.
2. The clock is automatically corrected, the dot matrix display 43 showing "R", when RDS CT data is received.

R 12:00

### NOTE:

If the RDS signal in reception is weak, the time adjustment by RDS function may require a little longer time.  
3. If the unit shows incorrect time caused by a wrong signal, adjust the time manually by referring to "Setting the Time" below.

#### Normal Clock

1. Press and hold the CLOCK button 29 for more than 3 seconds.
2. Press the CT button 28 to deactivate the RDS function.
3. Adjust the time by referring to the "Setting the Time" below.

12:00

#### Setting the Time

1. Press and hold the CLOCK button 29 for more than 3 seconds to enable the time adjust mode. The time display will blink when ready for setting.

### NOTE:

1. Make adjustments for 5 seconds blinking.
2. Adjusting the hours:  
Use H button 18 to adjust the hours
3. Adjusting the minutes:  
Use M button 19 to adjust the minutes

## OPERATION

### Handling the Detachable Front Panel

#### Removal

1. Press the PWR button 10 to turn the power Off. (Fig. 2)
2. Press the Release button. (Fig. 2)
3. The detachable front panel pops out. Grasp part of it and pull it off. (Fig. 3)

### NOTE:

After removing the detachable front panel, place it in the included case and protect it from strong shocks.

#### Installation

1. Check that there is no dirt, etc., in the grooves on the unit, then insert the detachable front panel from the right side. (Fig. 4)
2. Press on the detachable front panel at a point other than the button surface on the left side until a click is heard. (Fig. 5)
3. Touch the detachable front panel and check that it is securely fastened.

### NOTE:

Be sure to check that there is no dirt, dust, etc., on the connector terminals for the detachable face and unit before installing it.

# Disassembly Instructions

## 1. Removal of Nose Unit

- (1) Refer to the Owner's Manual (Part No. 68P40870W42).

## 2. Removal of Front Escutcheon

- (1) After removal of Top Cover, remove the Hooks (a) as shown in Figure 1.

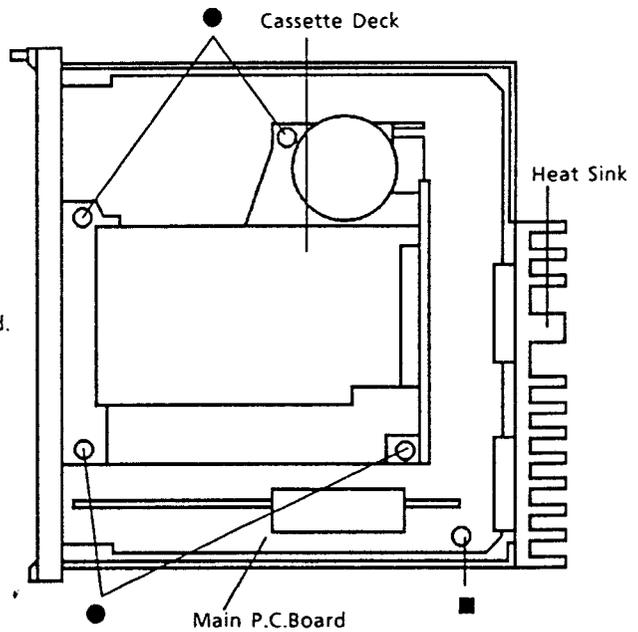

<Figure 1>

## 3. Removal of Cassette Deck

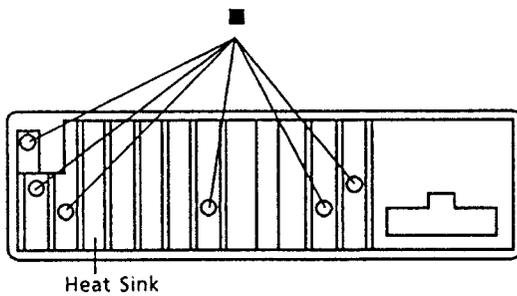

- (1) Remove four screws marked "●" as shown in Figure 2.  
 (2) Disconnect one Connector from the Cassette Deck.

## 4. Removal of Main P.C.Board

- (1) Remove seven screws marked "■" as shown in Figure 2, 3.  
 (2) Disconnect two connectors from the Main P.C.Board.

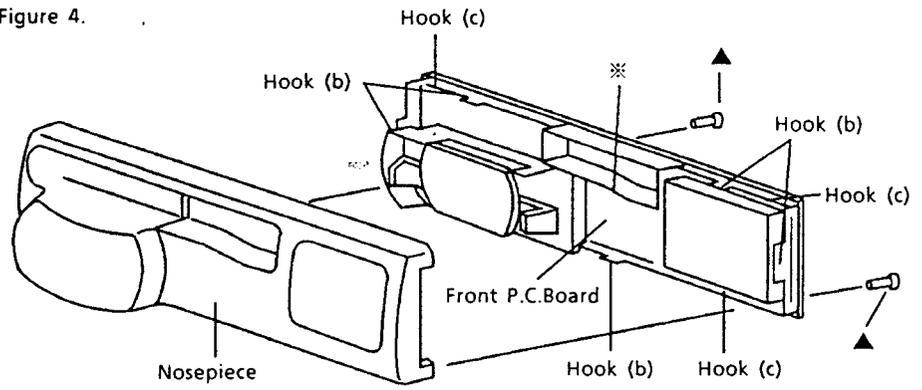

<Figure 2>

<Figure 3>

### 5. Removal of Front P.C.Board

- (1) After removal of Nose Unit, remove two screws marked "▲" and the Hooks (b) as shown in Figure 4.
- (2) Remove one screw marked "※" and the Hooks (c) as shown in Figure 4.

<Figure 4>

34	NC	—	Open.
35	CE	I	CE signal input from main microcomputer.
36	DISP REQ	I	Indication data sync signal input from main microcomputer.
37	REMO - CON	I	Remote control data input.
38	V <sub>DD</sub>	—	Connect to V <sub>DD</sub>
39	V <sub>DD</sub>	—	Positive power supply.
40	$\overline{\text{C/D}}$	O	Command / data output for LCD driver.
41	CLK	O	System clock output for LCD driver.
42	RESET	O	Reset output terminal for LCD driver. Active High.
43	$\overline{\text{SCK}}$	O	Serial clock output terminal to LCD driver.
44	KEY R0	I	Key - matrix signal input.

## 45609W04 (IC501)

No.	Symbol	I/O	Terminal Description
1	LPF	I	Low pass signal input terminal from microphone.
2	GND	—	GND short.
3	V <sub>DD</sub>	—	Positive power supply.
4	V <sub>DD</sub>	—	Positive power supply.
5	GND	O	GND short.
6	PLY SOL.	O	Attracts PLAY SOL and maintains HEAD BASE moved forward.
7	RF SOL.	O	Sets FF, REW, CUE or REV mode by pulling RF SOL so that PINCH ROLLER is retracted from capstan shaft.
8	EJ. SOL	O	Performs EJECT operation by pulling EJECT SOL to engage EJECT GEARS and to rotate motor in clockwise direction.
9	MOTOR-CONT	O	Determines rotation direction of motor in GR mechanism.
10	O-MOTOR	O	Determines start and stop of the motor in GR mechanism.
11	F/R	O	Determines running direction of tape depending upon rotation direction of motor. This signal is used to switch running direction and PRE AMP EQ circuit.
12	L. O. FAST	O	Signal to vary gain when judging blank space between programs in MS-IC because of different signal levels in PLAY and CUE & REV.
13	PK IN SW	I	Switch to detect cassette is installed into cassette holder or not. Pulled-up through 10K~50Kohm resistor connected to BAT + 5V.
14	METAL	I	Metal / Normal tape detector Switch. Pull up at 5V.
15	GND	—	GND short.
16	GND		

No.	Symbol	I/O	Terminal Description
17	GND	—	GND short.
18	7525 / 7524	I	7525 / 7524 set up terminal.
19	GND	I	GND short.
20	TP ALM	I	Alarm Output / audio signal switching Output terminal.
21	NOSE PWR	O	Power supply control terminal for Front panel.
22	POW IC ON	O	Power IC stand by control terminal.
23	CONT	O	System power supply control terminal.
24	MUTE	O	Audio mute signal output terminal.
25	OUT - REM	O	Remote signal output terminal.
26	OUT INT	O	Terminal which makes the then unit to PAUSE made in T. INFO on and TP OFF ALARM
27	IN PAU	I	Pause signal input terminal.
28	IN INT	I	Interrupt signal input terminal.
29	CHGR D OUT	O	CD Changer bus line data output terminal.
30	EV CLK	O	Clock output terminal for electrical volume (IC204).
31	EV DATA	O	Serial data output terminal for electrical volume (IC204).
32	EV CE	O	CE signal output terminal for electrical volume (IC204).
33	GND	—	GND potential terminal.
34	CHGR / ON	O	Audio signal switching output terminal.
35	TAPE / RADIO	O	TAPE / RADIO audio signal switching output terminal.
36	DOLBY C	O	Dolby C NR. ON signal output terminal.
37	DOLBY B	O	Dolby B NR. ON signal output terminal.
38	DTS CE	O	Stand by control terminal to DTS microcomputer.
39	DTS STRT	—	Command sync signal input terminal from DTS microcomputer.
40	DISP CE	O	Stand by Control terminal to Display microcomputer (IC401).
41	KEY DATA	I	Key data input terminal from Display microcomputer (IC401).
42	DISP REQ	O	Indication data sync signal output to Display microcomputer (IC401).
43	DISP CLK	O	Communication sync signal output terminal to Display microcomputer (IC401).
44	DISP DATA	O	Serial data output terminal to Display microcomputer (IC401).
45	TP ALM ON	O	Switches audio signal when TP OFF alarm signal output.
46	DTS MUTE	I	Audio mute signal input terminal from DTS microcomputer.
47	ACC + 5	—	ACC power supply detection terminal.
48	CHGR IN	I	CD Changer bus line data input terminal.
49	GND	—	GND Short.
50	DTS STS	I	Serial data signal input terminal from DTS microcomputer.

No.	Symbol	I/O	Terminal Description
51	DTS CMD	O	Serial data signal input terminal to DTS microcomputer.
52	$\overline{\text{DTS SCK}}$	I	Communication sync signal input terminal from DTS microcomputer.
53	BAT + 5	—	Battery power supply detection terminal.
54	GND	—	GND potential terminal.
55	X1	—	Crystal element connection terminal for sub system clock OSC.
56	X2	—	Crystal element connection terminal for sub system clock OSC.
57	GND	—	GND short.
58	X3	—	Ceramic element connection terminal for system clock OSC. (4.19MHz).
59	X4	—	Ceramic element connection terminal for system clock OSC. (4.19MHz).
60	$\overline{\text{RESET}}$	I	System reset input terminal.
61	DTS STNBY	—	Stand by pulse output terminal to DTS microcomputer.
62	GND	—	GND short.
63	GND	—	GND short.
64	GND	—	GND short.
65	GND	—	GND short.
66	GND	—	GND short.
67	GND	—	GND short.
68	GND	—	GND short.
69	GND	—	GND short.
70	GND	—	GND short.
71	GND	—	GND short.
72	DISP - RESET	—	Reset output terminal to Display microcomputer (IC401).
73	GND	—	Standard GND potential terminal for A/D converter.
74	$\overline{\text{NOSE ON}}$	I	Front panel detection terminal.
75	SELF VR	I	VR position signal terminal for audio control.
76	PK DN SW	I	Switch to detect cassette holder is moved down completely. Pulled - up through 10K~50Kohm resistor connected to BAT + 5V.
77	RUN DET	I	Signal showing take-up reel is rotating or not.
78	GND	—	GND short.
79	HPF	I	High pass signal input terminal from microphone.
80	MPF	I	Middle pass signal input terminal from microphone.

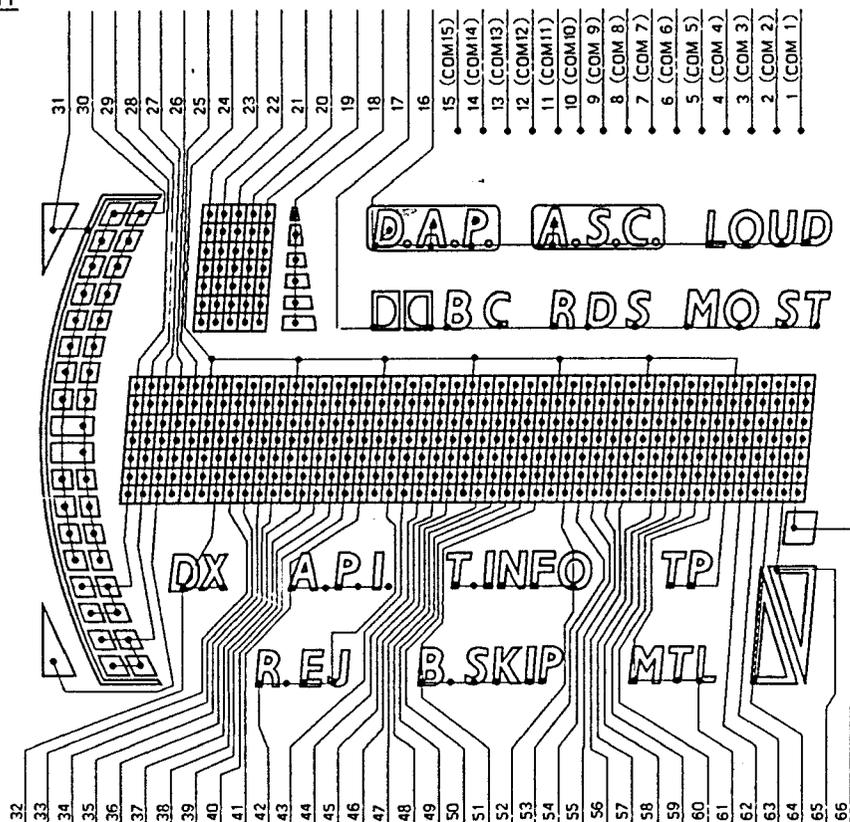

25699W31 (IC503)

No.	Symbol	I/O	Terminal Description
1	CE1	O	CE1 control terminal for S-RAM.
2	NC	—	Open.
3	$\overline{\text{DTS MUTE}}$	O	Audio mute output terminal.
4	$\overline{\text{7071 RESET}}$	O	Control the reset for LC7071.
5	50KREF	O	High output when REF frequency becomes 50kHz in FM mode.
6	$\overline{\text{RESET}}$	I	System reset input terminal.
7	X2	O	Output terminal for system clock OSC.
8	X1	—	Output terminal for system clock OSC.
9	V <sub>SS</sub>	—	GND terminal for device.
10	CE2 - 1	O	CE2 control terminal for S-RAM.
11	CE2 - 2	O	CE2 control terminal for S-RAM.
12	NC	—	Open.
13	NC		
14	NC		
15	A10	O	Input/Output terminal for S-RAM address signal.
16	A9		
17	A8		
18	AD7	I/O	Input/Output terminal for S-RAM address signal.
19	AD6		
20	AD5		
21	AD4		
22	AD3		
23	AD2		
24	GND	—	GND terminal for device.
25	AD1	I/O	Input/Output terminal for S-RAM address signal.
26	AD0		
27	LE	O	LE control terminal for latch.
28	DTS STB	I	Return from standby to DTS.
29	RDS CLOCK	I	Communication data sync signal input terminal from LC7071.
30	D START	I	Data sync signal input terminal from LC7071.
31	DATA	I	Serial data input terminal from LC7071.
32	DATA IN	I	Serial data input terminal.
33	AUDIO IN	I	Audio zero cross input terminal.

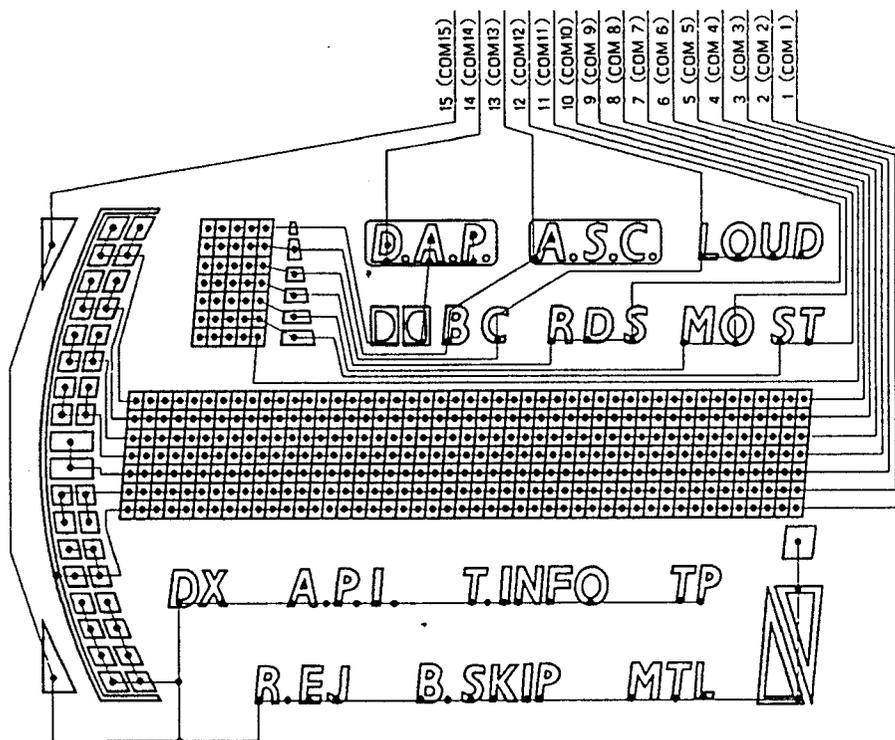

No.	Symbol	I/O	Terminal Description
34	DTS - START	I	Command sync signal input from main microcomputer.
35	DTS - CMD	I	Serial data input terminal from main microcomputer.
36	NC	—	Open.
37	NC		
38	DTS - CLK	I	Communication data sync signal input terminal from main microcomputer.
39	DTS - STS	O	Serial data output terminal to main microcomputer.
40	CA	I	Power supply terminal.
41	V <sub>DD</sub>	—	Power supply terminal for device.
42	AV <sub>SS</sub>	—	GND terminal for A/D converter.
43	AV <sub>REF</sub>	I	Reference Voltage input terminal for A/D converter.
44	$\overline{ST}$	I	Stereo signal input terminal.
45	$\overline{SK}$	I	SK signal input terminal.
46	SEARCH	I	Search start level detector port.
47	MULTIPATH	I	Port detects multipath interference of station.
48	$\overline{ADJON}$	I	Port detects multipath interference of station.
49	S. METER	I	Signal meter input terminal.
50	$\overline{DK}$	I	DK signal input terminal.
51	$\overline{RDS}$	I	RDS signal input terminal.
52	CLK	O	Communication data sync signal output terminal.
53	DATA OUT	O	Serial data output terminal.
54	$\overline{LPE SW}$	O	LPF time constant switching terminal to obtain fast response in AF search and FM seek operation.
55	$\overline{IF MUTE}$	O	Mute output terminal to prevent shock noises in AF search operation.
56	CE	O	Data communication control signal output terminal.
57	NC	—	Open.
58	LW	O	LW band selection terminal.
59	FM/AM	O	FM/AM (MW/LW) bands selection terminal.
60	$\overline{L/D}$	O	SEEK sensitivity switch control output terminal.
61	MONO	O	Stereo/Mono switch control output terminal.
62	CE	I	Terminal to make DTS in standby status.
63	SD	I	Station detector signal input terminal for FM/AM.
64	$\overline{WR}$	O	F-RAM $\overline{WE}$ control signal.

# Electrical Parts List

Resistor : Carbon resistors under 1/4 watts are not mentioned in the parts list, please confirm them by schematic diagram.

Capacitor :  $\mu F$  = microfarads, pF = picofarads

Abbreviations				Symbol No.	Part No.	Description
RES. = Resistor	CAP. = Capacitor

## List of Usable Oil

- 1) Molykote G paste
- 2) Grease EM-30L
- 3) Grease PG-671

## List of Usable Jigs

- 1) GR bottom gear jig (Part No. 44A20788W01)
- 2) Head height adjustment gauge  
AI-500 (Part No. AI-500)

# Memo

# Disassembly, Assembly and Replacement of Functional Parts

## 1. Disassembly and Assembly of Bottom Cover

- (1) Turn the mechanism around as shown in Figure 1.
- (2) Remove M1 lock washer ① as shown in Figure 1.
- (3) Remove three screws ② as shown in Figure 1.
- (4) Lift the bottom cover slowly from the position ①-A-1, pull the hooks out of the holes in the chassis, and remove the bottom cover as shown in Figure 1.
- (5) When remounting the bottom cover, first turn the front of the mechanism up as shown in Figure 2.
- (6) Slide the slider in the direction ①-A-2 as shown in Figure 2.
- (7) Push down the cassette holder in the direction ①-A-3 as shown in Figure 2.
- (8) Pull the door pin in the direction ①-A-4 so that the mechanism is locked in as shown in Figure 2.
- (9) Turn the mechanism around as shown in Figure 3.
- (10) Pull the automatic metal lever in the direction ①-A-5 and the RF solenoid chip in the direction ①-A-6 as shown in Figure 3.

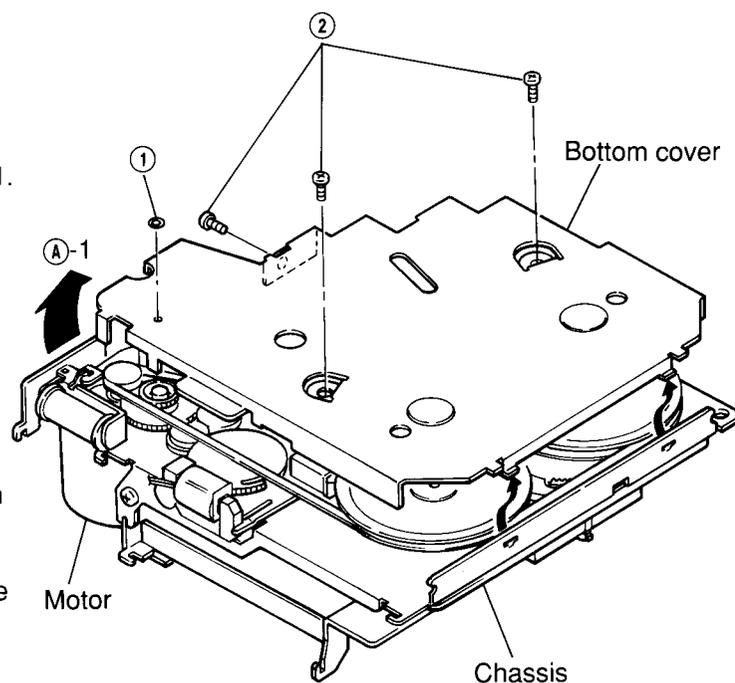

Figure 1

- (11) Insert the hooks of the bottom cover into the chassis in the direction ①-A-7, and then join the part ①-A-8 of the bottom cover to the chassis slowly, making sure that the 3 points indicated with the straight lines in the Figure 3 are fitted properly.

If there are troubles in mounting the bottom cover, do not apply force but remove the bottom cover once again and check the positions of the individual parts. (Refer to Figure 3.)

- (12) Since the hooks marked ①-A-8 will be lifted slightly as shown in Figure 4, insert the jig through the hole ①-A-9, and fix it turning the jig slightly in the direction ①-A-11.

Instead of operation (12), turn the gear nose slowly with a precision screwdriver etc., taking care not to damage it.

After 2 to 3 turns, it will click into place.

(Refer to Figures 4 and 5.)

- (13) Fix the screws and the lock washer that have been removed.

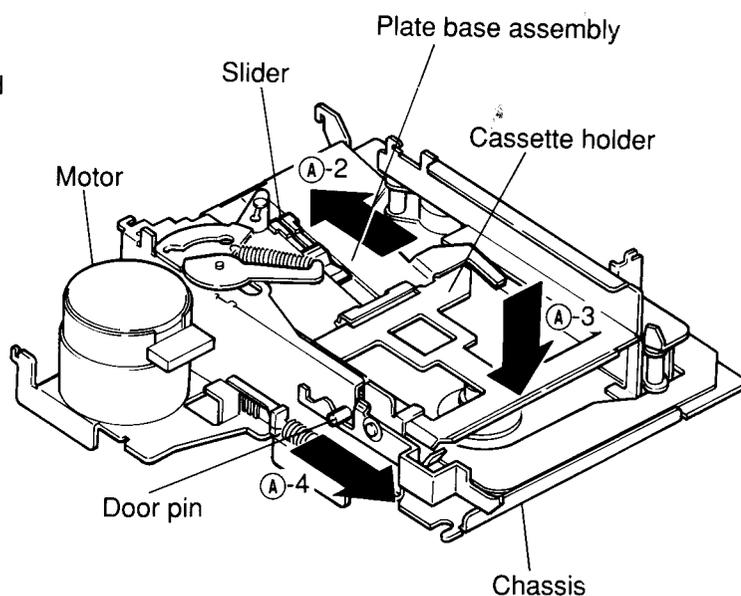

Figure 2

(14) Insert the jig into the hole (A-9) as shown in Figure and rotate the eject solenoid counterclockwise about 20 times, pulling it in the direction (A-10) with the finger. Then the eject operation is completed. Instead of operation (14), the eject operation can be performed by mounting the mechanism to the product. (Refer to Figures 4 and 5.)

**Note:** Do not reuse the used lock washers for mounting.  
When turning the mechanism, be careful not to drop the gear and the flywheel.  
Fasten the three screws with a fastening torque of 6 kg.cm.

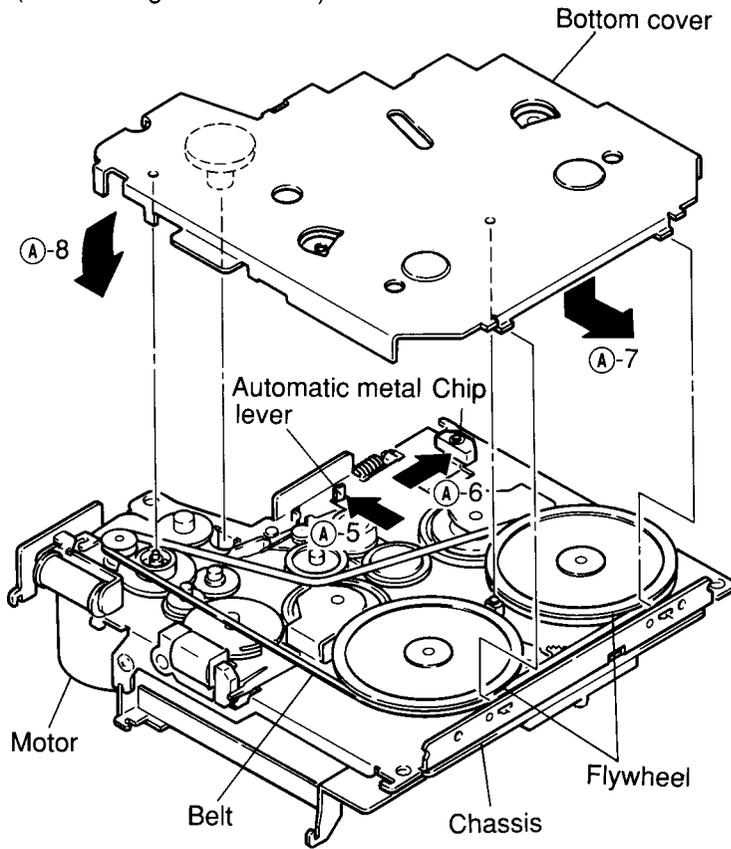

Figure 3

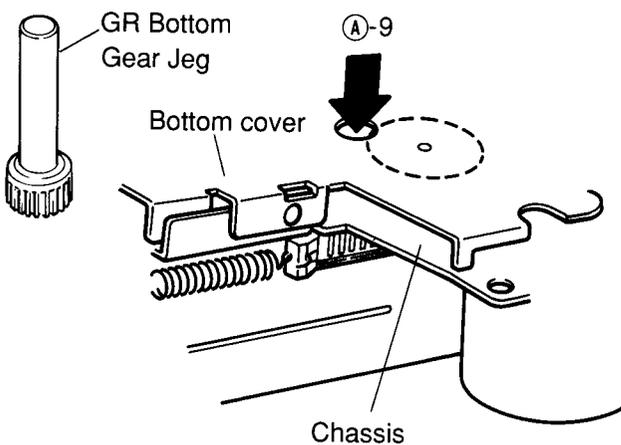

Figure 4

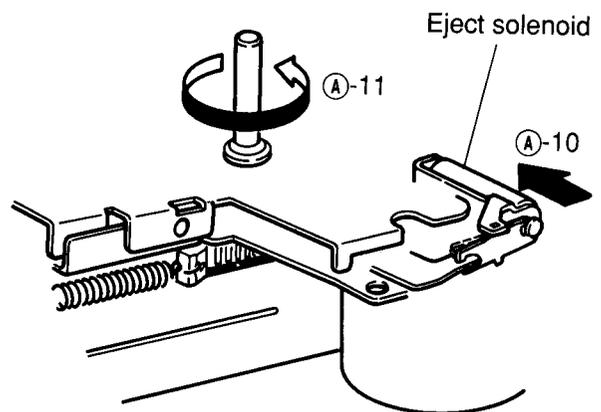

Figure 5

## 2. Replacement of the bottom cover mounting parts

### a. Replacement of the eject gear

- (1) Remove M1.2 lock washer ③ as shown in Figure 6.
- (2) Pull the eject pinion out of the eject gear and remove the eject gear as shown in Figure 6.
- (3) Apply the molykote E paste to the section ⑧-1, and mount the eject gear following the removal steps in the reverse order. After replacement is finished, make sure that the gear rotates smoothly. (Refer to Figure 6.)

**Note:** Do not reuse the used lock washers for remounting.  
Take care to avoid damage by piercing and tearing.

### b. Replacement of the RF solenoid

- (1) Remove two solders ④ and remove the RF solenoid from the bottom cover by pulling it up as shown in Figure 6.
- (2) Replace the solenoid with a new one, and remount it following the removal steps in the reverse order as shown in Figure 6.

**Note:** When removing solder ④, set the temperature of the soldering iron to  $350^{\circ} \pm 10^{\circ}$  and the soldering time to 1 – 3 seconds. Take care that the solder is not loose, that there is no shortcircuit and that the coating is not damaged.

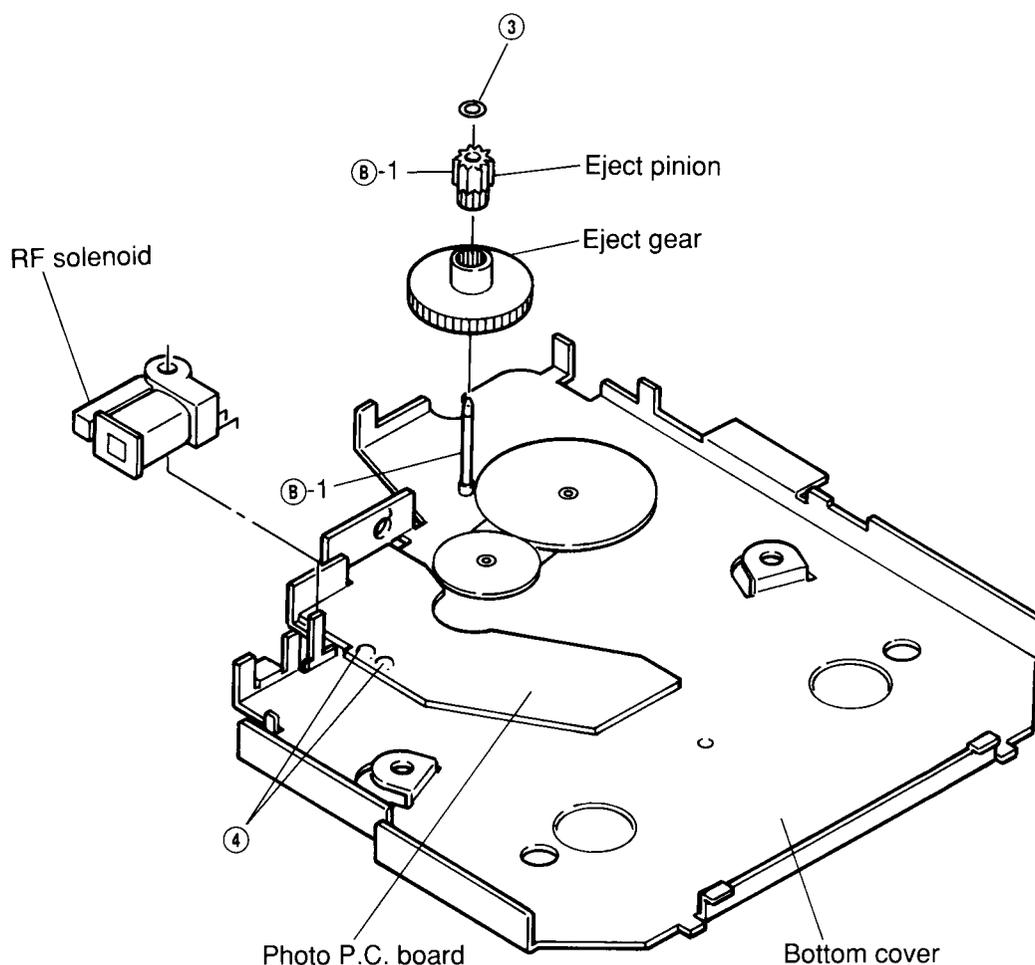

Figure 6

c. Replacement of the photo sensor

- (1) Remove four solders (5) as shown in Figure 7.
- (2) Remove the photo guide together with the photo sensor from the photo P.C. board as shown in Figure 7.
- (3) Insert the new photo sensor into the photo guide, and bend the legs of the photo sensor in the direction marked (B)-2 as shown in Figure 7.
- (4) Insert the photo guide into the P.C. board and solder the legs so that the photo sensor is set as indicated by [ ] in Figure 7.

**Note:** When using the soldering iron, set the temperature of the soldering iron to  $350^{\circ} \pm 10^{\circ}$  and the soldering time to 1 – 3 seconds. Take care that the solder is not loose, that there is no shortcircuit and that the coating is not damaged. Also take care that the photo guide is properly fixed and straight.

d. Replacement of the detector switch

(Automatic metal pack-in)

- (1) Remove 4 solders (6) with which the switch is fixed as shown in Figure 7.
- (2) Prepare the terminals of the switch of the new solder as shown in Figure 8.
- (3) After that, insert the switch into the photo P.C. board, and solder the terminals.

**Note:** When using the soldering iron, refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Also take care that the switch guide is properly fixed and straight.

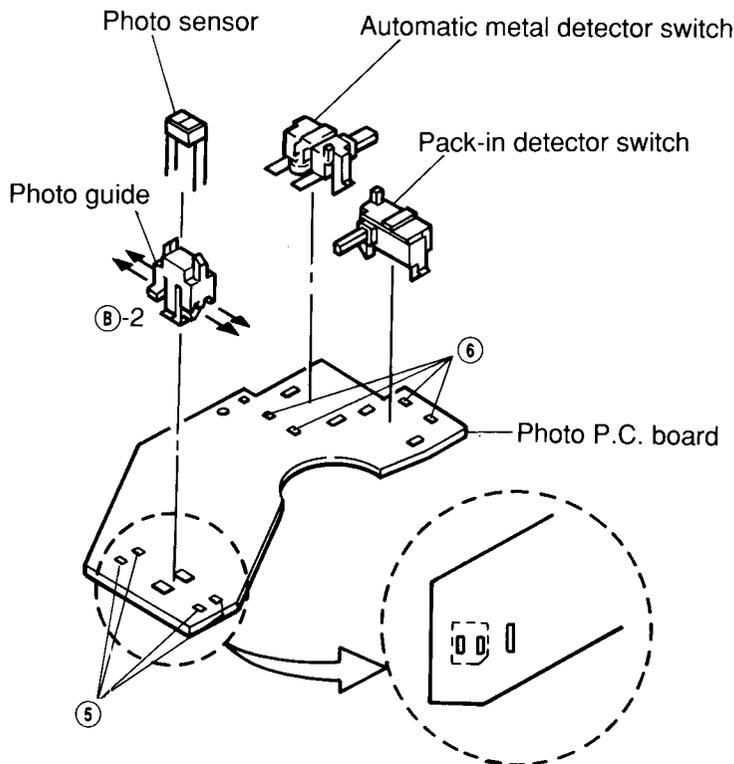

Figure 7

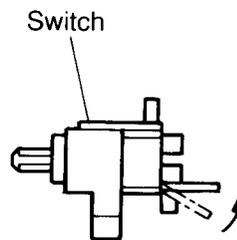

Figure 8

### 3. Replacement of the mounting parts on the rear of the main chassis

#### a. Replacement of the belt

- (1) After removing the bottom cover, remove the belt.
- (2) Clean the new belt with absolute alcohol, and fix it as shown in Figure 9.

**Note:** When fixing the belt, make sure that it is not twisted or dirty. When removing the belt, do not turn up the front of the chassis.

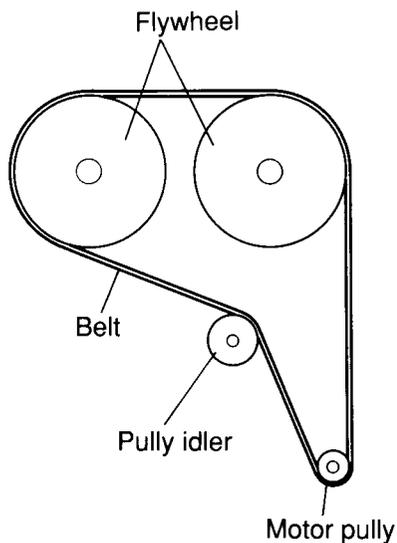

Figure 9

#### b. Replacement of the motor

- (1) After removing the belt, remove spring ⑦ as shown in Figure 10.
- (2) Remove solder ⑧-1, and remove the parallel wire (5P) from the control P.C. board as shown in Figure 11.
- (3) Remove two screws ⑨ and ⑩, and remove the motor, taking care not to damage the motor idler gear. (Refer to Figure 10.)
- (4) Mount the new motor following the removal steps in the reverse order.

**Note:** Refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Since the parallel wire is very easily damaged, handle it with care.

Fasten the two screws with a fastening torque of 3 kg.cm.

\*When inserting the clutch spring, be careful of the inserting direction as shown in the Figure.

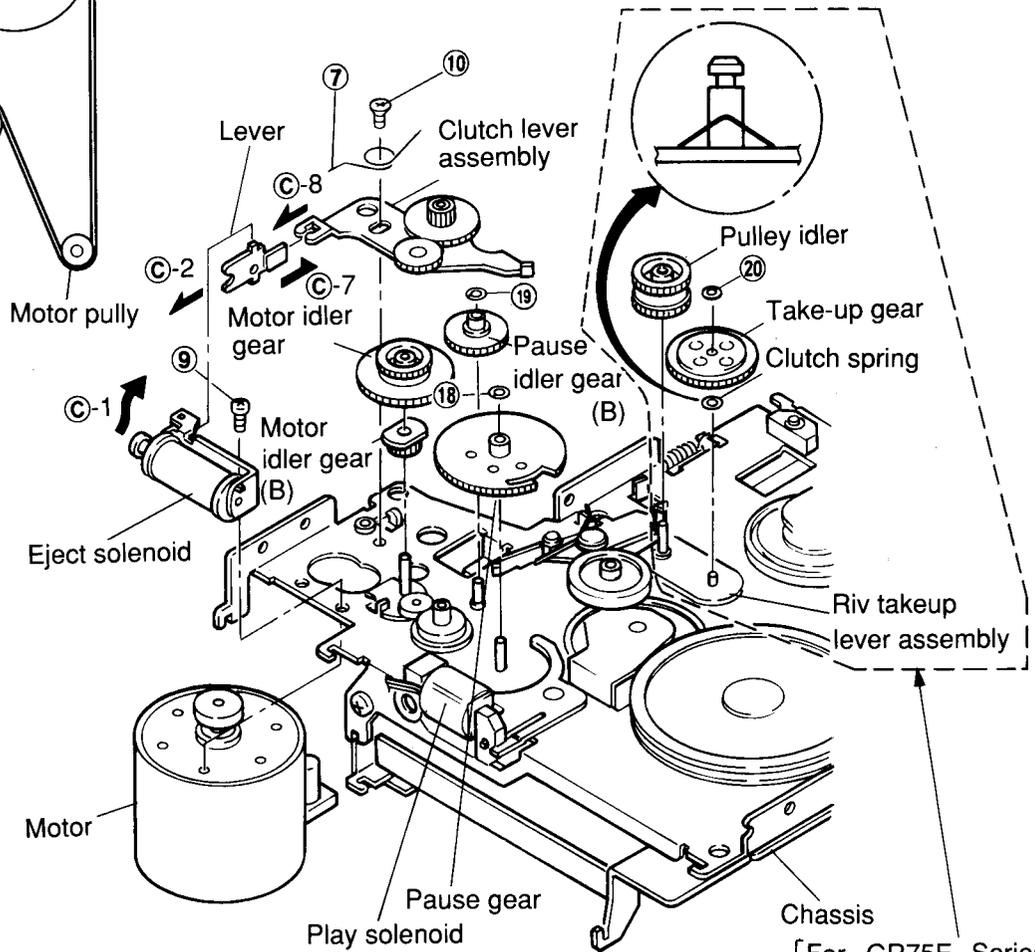

Figure 10

[ For GR75E Series  
GR75L Series  
GR-Y Series  
models ]

c. Replacement of the flywheels

- (1) After removing the belt, pull out the two flywheels. Take care not to lose the polyslider washer (11) located between the flywheel and the chassis. (Refer to Figure 12.)
- (2) Fix the polyslider washer to the new flywheel and mount the flywheel to the chassis.

d. Replacement of the play solenoid

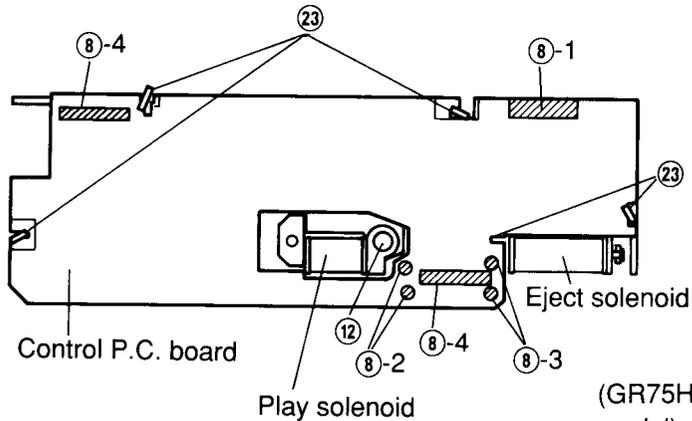

- (1) Remove the two solders (8-2) as shown in Figure 11.
- (2) Remove one screw (12) and remove the solenoid as shown in Figure 11.
- (3) Mount the new solenoid following the removal steps in the reverse order.

**Note:** Refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Fasten the screws with a fastening torque of 2.3 kg.cm.

e. Replacement of the eject solenoid

- (1) Remove two solders (8-3). Take care not to lose the tube that protects the wire. (Refer to Figure 11.)
- (2) Remove screw (9) and remove the solenoid as shown in Figure 10.
- (3) Align position (C)-1 of the new solenoid with position (C)-2 of the lever and fasten the screw as shown in Figure 10.
- (4) Lead the wire through the tube and solder it.

**Note:** Refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Fasten the screws with a fastening torque of 3 kg.cm. As the solenoid wires are not insulated, do not let them cross each other.

[For GR75E Series model]

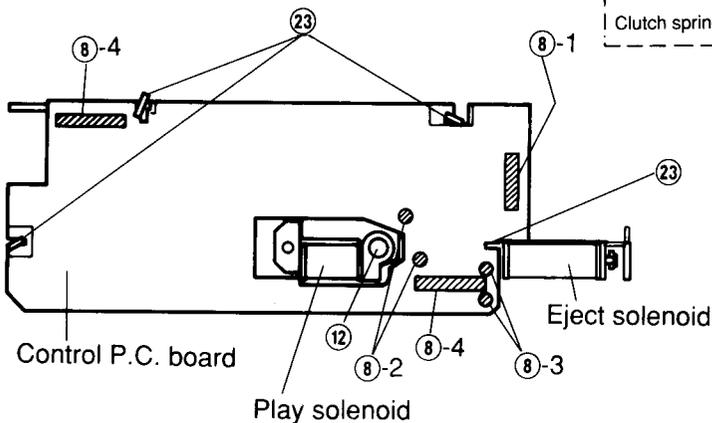

Figure 11

[For GR75L Series  
GR-Y Series  
GR75H Series models]

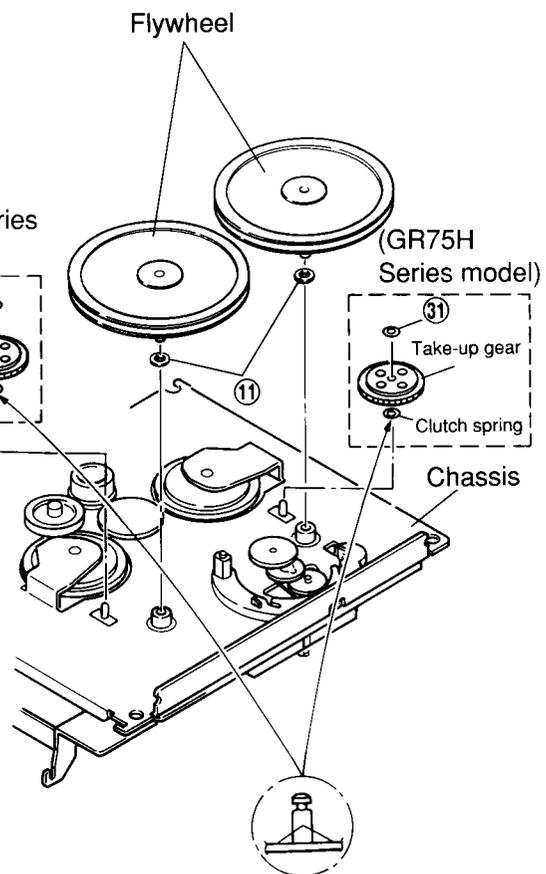

Figure 12

## f. Replacement of gears

## (f-1) Replacement of the reverse idler gear

- (1) Remove M1.2 lock washer ⑬, pull it up from the stud of the chassis and remove the gear as shown in Figure 13.
- (2) Remount following the removal steps in the reverse order.

## (f-2) Replacement of the sun gear

- (1) Remove M1.2 lock washer ⑭, pull it up from the stud of the chassis and remove the gear as shown in Figure 13.
- (2) Mount it, following the removal steps in the reverse order.

## (f-3) Replacement of the fixing gear

- (1) Adjust the two mounting claws for the fix gear on the chassis ⑮ and remove the section ㉔-3 of the gear by pulling it up in the direction of the arrow shown in Figure 13.
- (2) Insert the section ㉔-4 of the new gear into the chassis, and mount it following the removal steps in the reverse order as shown in Figure 13.

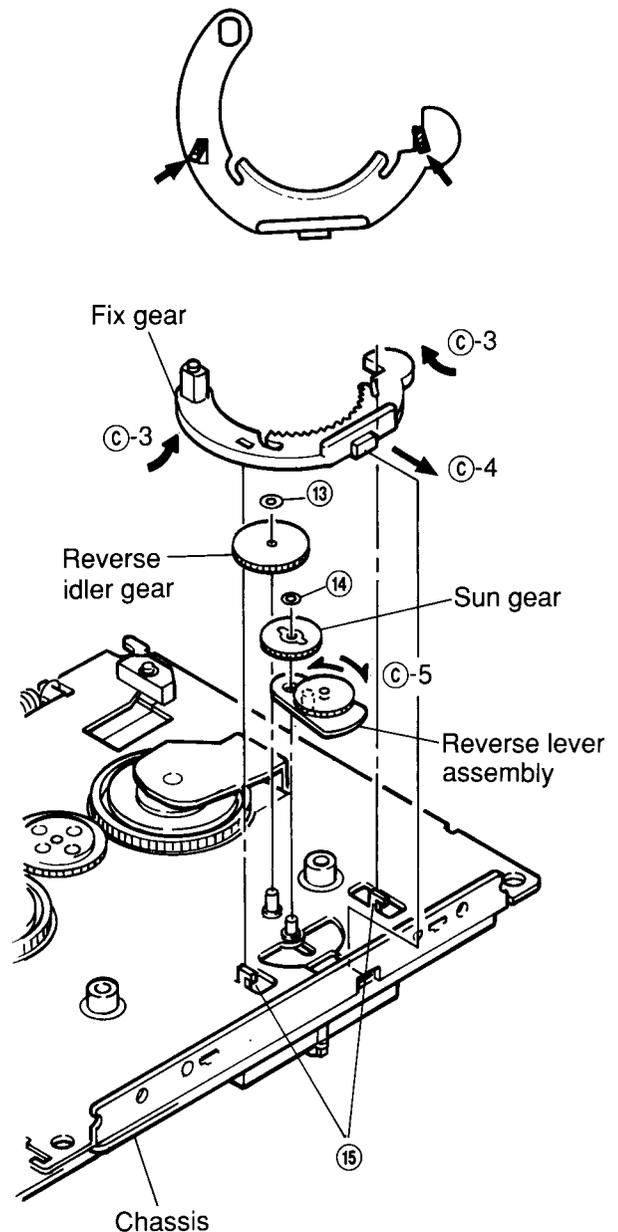

## (f-4) Replacement of the reverse lever assembly and planet gear

- (1) Remove both the fixing gear and the sun gear and remove the reverse lever assembly as shown in Figure 13.
- (2) Remove M1.7 lock washer ⑯ and remove the planet gear as shown in Figure 14.
- (3) Mount the new planet gear and reverse lever following the removal steps in the reverse order.

**Notes on f-1 through f-4:**

After mounting all parts, check if the reverse lever moves in the directions marked ㉔-5 when the reverse gear is turned clockwise and counterclockwise.

\* After mounting the fixing gear, bend the claws ⑮ into the form of as shown in the Figure.

**Figure 13**

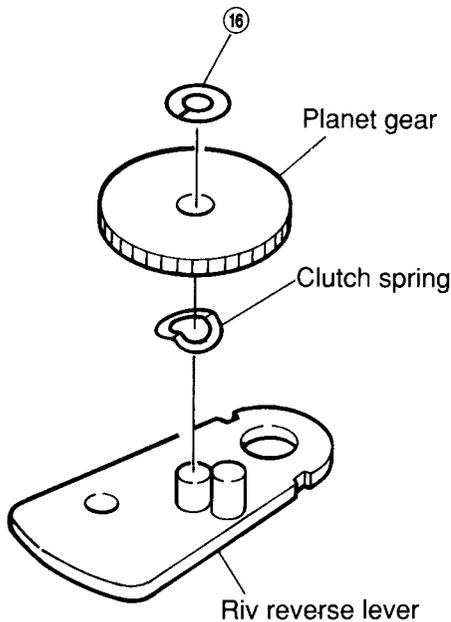

(f-5) Replacement of the clutch lever assembly and eject idler gear

- (1) After removing the motor, remove the motor idler gear and the motor idler gear (B) and remove the clutch lever assembly as shown in Figure 10.
- (2) Remove M1.2 lock washer (17) and remove the eject idler gear as shown in Figure 15.
- (3) Mount the new gears and clutch lever following the removal steps in the reverse order.

**Note:** When mounting the gears to the lever, apply grease (PG-671) to the position ©-6 as shown in Figure 15. Align the position ©-7 with the position ©-8 and mount the clutch lever as shown in Figures 10 and 15.

(f-6) Replacement of the pause gear

- (1) Remove M1.2 lock washer (18) and remove the pause gear pulling it up from the stud of the chassis as shown in Figure 10.
- (2) Mount the new gear following the removal steps in the reverse order.

[Disassembly Reverse Lever Assembly]

**Figure 14**

(f-7) Replacement of the pause idler gear (B)

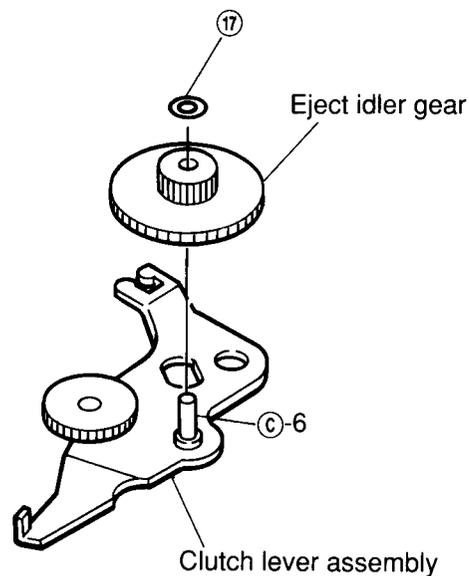

- (1) After removing the motor and the motor idler gear, remove M1.2 lock washer (19) and remove the gear by pulling it up from the stud of the chassis as shown in Figure 10.
- (2) Mount the new gear by following the removal steps in the reverse order.

(f-8) Replacement of the take-up gear

- (1) After removing the belt and the pulley idler gear, remove M1.2 lock washer (20) by pulling it up from the stud of the riv take-up lever assembly as shown in Figure 10. After removing the Flywheel, remove M1.2 lock washer (31) and remove the gear by pulling it up from the stud of the chassis as shown in figure 12. [For GR75H Series model]
- (2) Remount the take-up gear following the removal steps in the reverse order.

**Notes on f:**

Do not reuse the used washers. Take care to avoid damage by piercing and tearing.

**Figure 15**

#### 4. Replacement of the parts mounted on the front of the main chassis

##### a. Replacement of the audio P.C. board

- (1) Remove two solders ⑳ and remove the parallel wire (7P) and the head P.C. board as shown in Figure 16.
- (2) Adjust the two claws ㉒ to the rectangular holes on the P.C. board and remove the P.C. board as shown in Figure 16.
- (3) After replacement, mount the new P.C. board following the removal steps in the reverse order.

**Note:** The head P.C. board and the parallel wire are easily damaged. Handle them with care. Refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Do not bring the soldering iron near the head P.C. board.

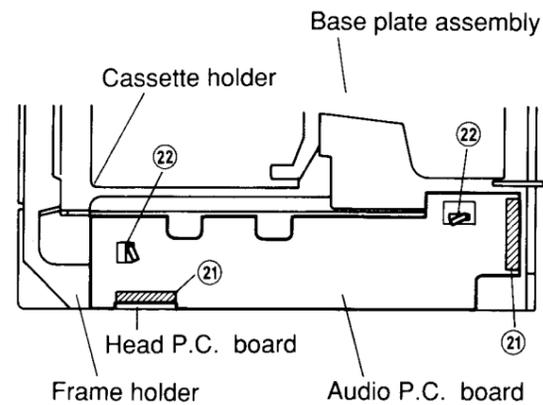

Figure 16

##### b. Replacement of the control P.C. board

- (1) Remove seven solders ㉑ and remove the three parallel wires and the wires of the eject solenoid and of the play solenoid as shown in Figure 11.
- (2) Remove five claws ㉓ and remove the P.C. board as shown in Figure 11. [For GR75E Series model] Remove four claws ㉓ and remove the P.C. board as shown in Figure 11. [For GR75L Series, GR-Y Series, GR75H Series models]
- (3) After replacing the old P.C. board with a new one, mount it following the removal steps in the reverse order.

**Note:** As mentioned in Item 4-a, handle the parallel wires carefully, and be sure that the temperature of the soldering iron and the soldering time are proper. As the wires of the eject solenoid are not insulated, do not let them cross each other.

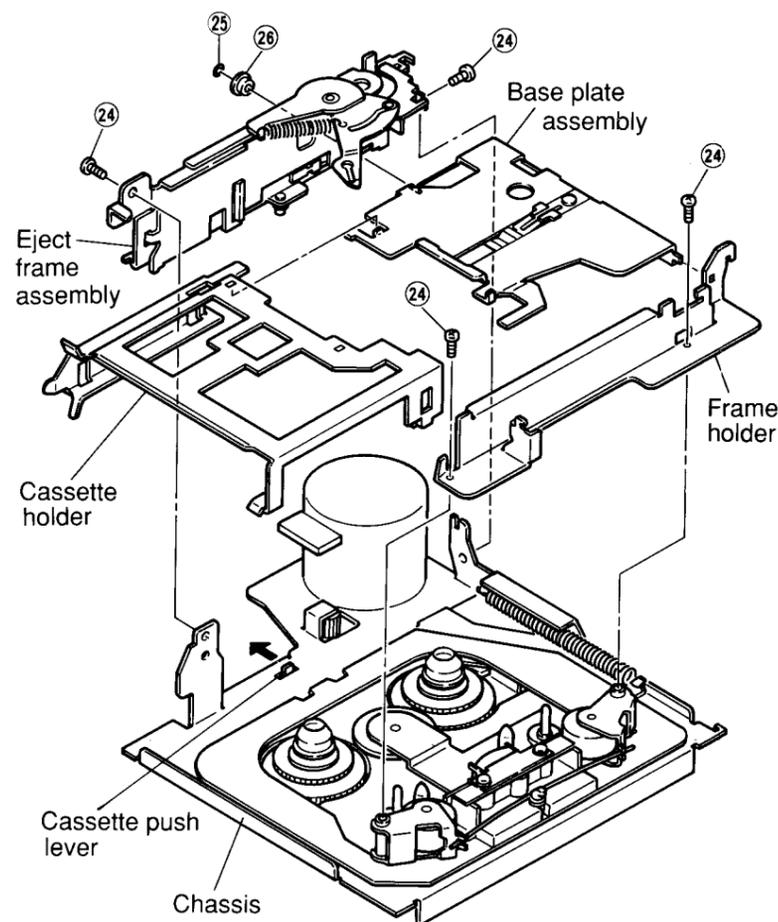

Figure 17

##### c. Disassembly and assembly of the cassette holder

- (1) Remove four screws ㉔ and remove the eject frame assembly and the frame holder as shown in Figure 17.
- (2) Remove M1.2 lock washer ㉕ and plate base roller ㉖ and remove the cassette holder and the base plate assembly as shown in Figure 17.
- (3) Remount them following the removal steps in the reverse order.

- Notes:**
1. When mounting the cassette holder and the base plate, insert the slider shaft into the eject arm and fix them turning the slider shaft in the direction indicated by the arrow in the figure. Make sure that the cassette holder and the base plate are in the cassette-in mode during this operation. (Refer to Figure 18).
  2. When mounting the eject frame assembly, push the cassette push lever in the direction indicated by the arrow in the Figure 17.
  3. When mounting the base plate assembly and the eject frame assembly, or when mounting the eject frame assembly to the chassis, do not apply excessive force to avoid deformations of the eject arm and the frame.
  4. Do not reuse the used washers. Take care to avoid damage by piercing and tearing.

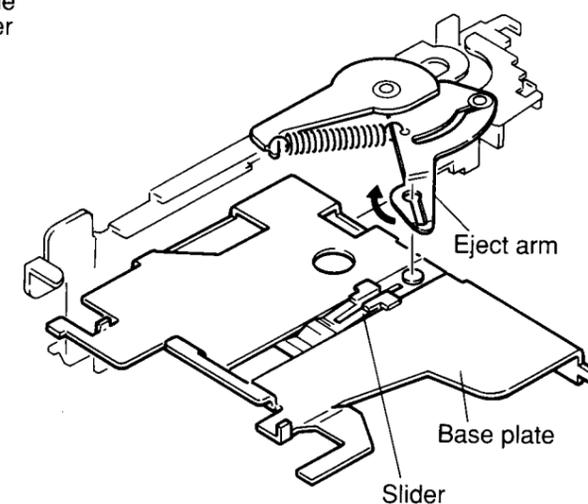

Figure 18

##### d. Replacement of the reels

- (1) Remove M1.7 two lock washers ㉖ (Refer to figure 19).
- (2) Move the select lever in the direction marked ㉑-1 in the Figure and remove the reel by gripping the reel gear as shown in Figure 19.
- (3) After replacement, mount the new reels following the removal steps in the reverse order.
- (4) After mounting, check the tape speed and the wow and flutter with test tape MTT-111.

**Note:** Since the reel is easily loosened if the cap is gripped, always handle it gripping the gear. Do not reuse the used washers. Take care to avoid damage by piercing and tearing.

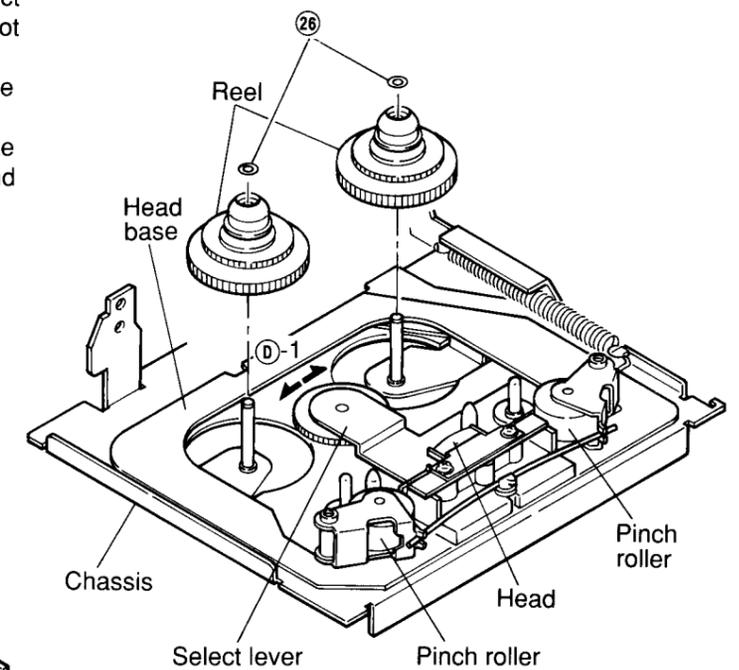

Figure 19

## e. Replacement of the pinch rollers

- (1) Remove pinch roller spring ⑳ as shown in Figure 20.
- (2) Remove M3.1 two lock washers ㉘ and remove the pinch roller as shown in Figure 20.
- (3) Mount the pinch rollers following the removal steps in the reverse order.  
Apply insulation coating to the position ㉑-2 of the pinch roller as shown in Figure 20.

**Note:** Make sure that the pinch rollers are thoroughly fixed and that they are not deformed. Do not reuse used lock washers. Take care to avoid damage by piercing and tearing.

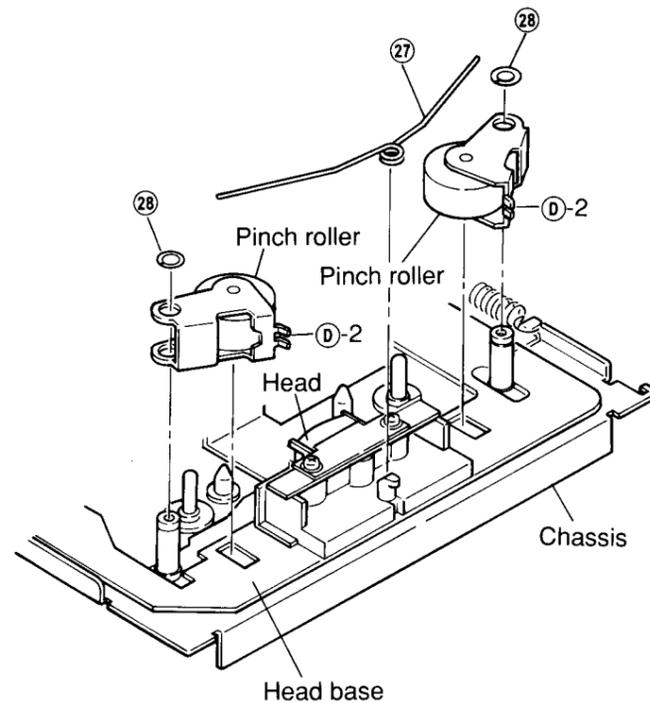

Figure 20

## f. Replacement of the head

- (1) After removing the pinch roller spring, remove two screws ㉙ as shown in Figure 21.
- (2) Remove solder ㉚ and remove the head from the head P.C. board as shown in Figure 22.
- (3) After replacement, mount the new head following the removal steps in the reverse order.

**Notes:** 1. Refer to Item 2-C to make sure that the temperature of the soldering iron and the soldering time are proper. Do not bring the soldering iron near the head P.C. board. Make sure that the head P.C. board is not lifted.  
2. Fasten the two screws with a fastening torque of 2.3 kg.cm. Note that the tension of the head spring can be decreased if the screws are fastened too strongly.

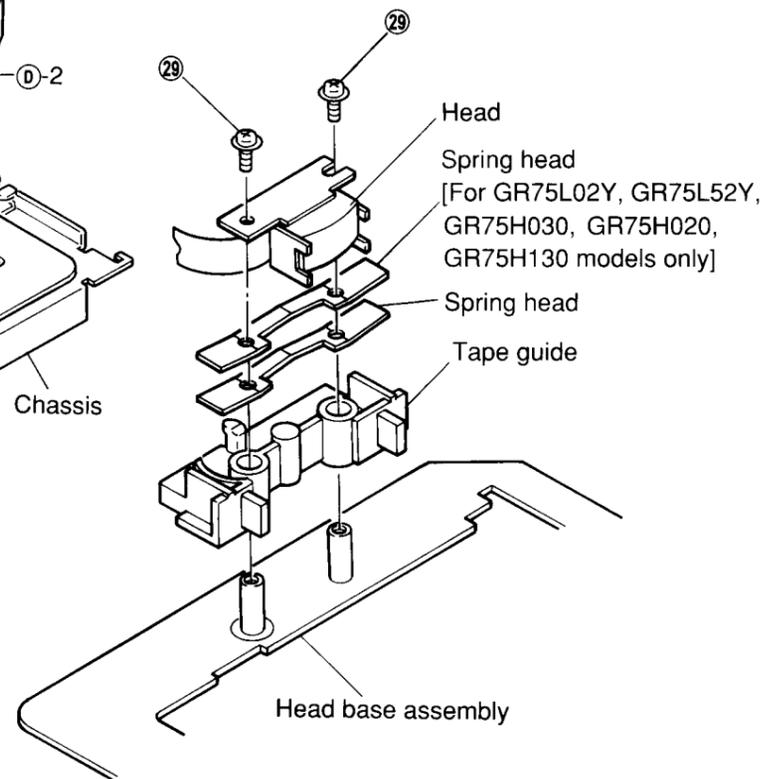

Figure 21

- (4) Adjust the height of the head as shown in Figures 23, 24 and 25.

- ① Place the height adjustment gauge (AI-500) on the head base, and adjust the height so that the check bar fits in the tape head guide smoothly.
- ② When the check bar touches the top (or bottom) of the tape guide, insert a spacer (t 0.1 mm or polislider washer t 0.13 mm). If necessary, remove the spacer.

**Note:** If you do not have a height gauge like described in (4)-①, run the tape at normal speed and adjust the height of the head and the tape head guide so that the tape does not curl.

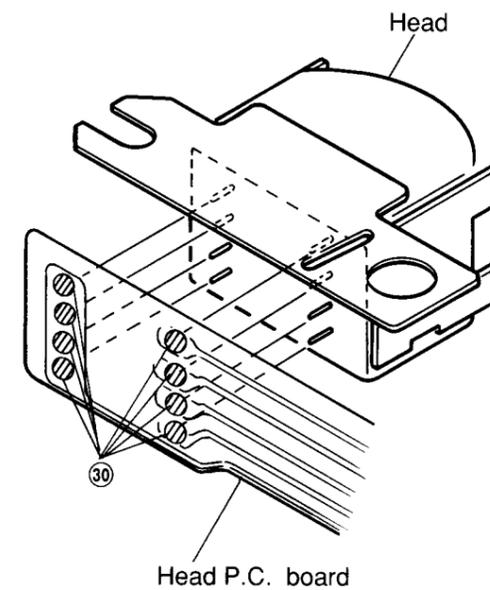

Figure 22

- (5) After having assembled the complete mechanism, adjust the angle of the head with test tape MTT-113C. (Refer to chapter "Adjustment of the head angle".) After the adjustment, apply the screw lock and fix the screws.
